

Build Something Cleaner

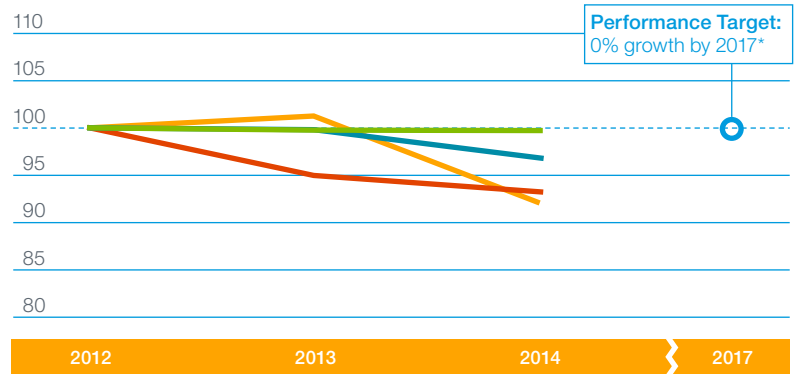

Boeing has a clear strategy and commitment to take action to address concerns about climate change and the environment. This is good for our business, customers, employees and Boeing communities around the world.

Aerospace is an essential part of modern life, and the tremendous benefits it provides mean that the industry and our company will continue to grow.

As a company, we understand that taking care of the environment is crucial to our aerospace and technology leadership. Boeing employees are actively working to improve the environmental performance of our products and services to substantially reduce CO₂ emissions and noise. In sum, Boeing is committed to building a better planet.
