

## New routine 200 MHz FT NMR Spectrometer TESLA BS 688

- high performance NMR system with excellent sensitivity, lineshape and resolution
- 32 bit PC/AT data system
- sophisticated software with the windows environment
- flexible 1D data processing - 2D package coming soon
- interactive, user-friendly arrangement
- easy-of-use pulse programming capabilities
- outstanding multinuclear broadband amplifiers
- direct digital synthesis of frequency offsets and phase shifts
- observe frequency selectable using plug-in units
- incredible price/performance value

### The best NMR system for

- routine qualitative and quantitative analysis in industry, diagnostics facilities and research institutions
- student's training at the universities
