

# CONTENTS IN DETAIL

## PREFACE

xi

<b>1</b>		
<b>SOME PRELIMINARIES FOR BEGINNERS AND PROS</b>		<b>1</b>
1.1	Debugging Tools Used in This Book .....	1
1.2	Programming Language Focus .....	2
1.3	The Principles of Debugging .....	2
1.3.1	The Essence of Debugging: The Principle of Confirmation .....	2
1.3.2	Of What Value Is a Debugging Tool for the Principle of Confirmation? .....	3
1.3.3	Other Debugging Principles .....	4
1.4	Text-Based vs. GUI-Based Debugging Tools, and a Compromise Between Them ...	5
1.4.1	Brief Comparison of Interfaces .....	5
1.4.2	Compromises .....	12
1.5	Main Debugger Operations .....	14
1.5.1	Stepping Through the Source Code .....	14
1.5.2	Inspecting Variables .....	15
1.5.3	Issuing an "All Points Bulletin" for Changes to a Variable .....	17
1.5.4	Moving Up and Down the Call Stack .....	17
1.6	Online Help .....	19
1.7	Introductory Debugging Session .....	19
1.7.1	The GDB Approach .....	22
1.7.2	The Same Session in DDD .....	36
1.7.3	The Session in Eclipse .....	38
1.8	Use of Startup Files .....	43
<b>2</b>		
<b>STOPPING TO TAKE A LOOK AROUND</b>		<b>47</b>
2.1	Mechanisms for Pause .....	47
2.2	Overview of Breakpoints .....	48
2.3	Keeping Track of Breakpoints .....	49
2.3.1	Breakpoint Lists in GDB .....	49
2.3.2	Breakpoint Lists in DDD .....	50
2.3.3	Breakpoint Lists in Eclipse .....	51
2.4	Setting Breakpoints .....	51
2.4.1	Setting Breakpoints in GDB .....	51
2.4.2	Setting Breakpoints in DDD .....	55
2.4.3	Setting Breakpoints in Eclipse .....	56
2.5	Extended GDB Example .....	56

2.6	Persistence of Breakpoints .....	59
2.7	Deleting and Disabling Breakpoints .....	60
2.7.1	Deleting Breakpoints in GDB .....	61
2.7.2	Disabling Breakpoints in GDB .....	62
2.7.3	Deleting and Disabling Breakpoints in DDD .....	62
2.7.4	Deleting and Disabling Breakpoints in Eclipse .....	63
2.7.5	“Moving” Breakpoints in DDD .....	64
2.7.6	Undoing/Redoing Breakpoint Actions in DDD .....	66
2.8	More on Viewing Breakpoint Attributes .....	67
2.8.1	GDB .....	67
2.8.2	DDD .....	69
2.8.3	Eclipse .....	69
2.9	Resuming Execution .....	69
2.9.1	In GDB .....	70
2.9.2	In DDD .....	78
2.9.3	In Eclipse .....	79
2.10	Conditional Breakpoints .....	79
2.10.1	GDB .....	80
2.10.2	DDD .....	83
2.10.3	Eclipse .....	84
2.11	Breakpoint Command Lists .....	85
2.12	Watchpoints .....	89
2.12.1	Setting Watchpoints .....	90
2.12.2	Expressions .....	93

### **3**

## **INSPECTING AND SETTING VARIABLES**

### **95**

3.1	Our Main Example Code .....	95
3.2	Advanced Inspection and Setting of Variables .....	98
3.2.1	Inspection in GDB .....	98
3.2.2	Inspection in DDD .....	102
3.2.3	Inspection in Eclipse .....	103
3.2.4	Inspecting Dynamic Arrays .....	104
3.2.5	What About C++? .....	109
3.2.6	Monitoring Local Variables .....	112
3.2.7	Examining Memory Directly .....	112
3.2.8	Advanced Options for Print and Display .....	112
3.3	Setting Variables from Within GDB/DDD/Eclipse .....	113
3.4	GDB’s Own Variables .....	113
3.4.1	Making Use of the Value History .....	114
3.4.2	Convenience Variables .....	114

### **4**

## **WHEN A PROGRAM CRASHES**

### **117**

4.1	Background Material: Memory Management .....	118
-----	--	-----

4.1.1	Why Does a Program Crash? .....	118
4.1.2	Program Layout in Memory .....	118
4.1.3	The Notion of Pages .....	121
4.1.4	Details on the Role of the Page Table .....	122
4.1.5	A Slight Memory-Access Bug <i>Might Not</i> Cause a Seg Fault .....	124
4.1.6	Seg Faults and Unix Signals .....	125
4.1.7	Other Types of Exceptions .....	128
4.2	Core Files.....	129
4.2.1	How Core Files Are Created .....	129
4.2.2	Your Shell May Suppress the Creation of a Core File .....	130
4.3	Extended Example .....	131
4.3.1	First Bug .....	135
4.3.2	Don't Leave GDB During a Debugging Session .....	137
4.3.3	Second and Third Bugs .....	137
4.3.4	Fourth Bug .....	139
4.3.5	Fifth and Sixth Bugs .....	141

## **5** **DEBUGGING IN A MULTIPLE-ACTIVITIES CONTEXT** **145**

5.1	Debugging Client/Server Network Programs .....	145
5.2	Debugging Threaded Code.....	151
5.2.1	Review of Processes and Threads .....	151
5.2.2	Basic Example .....	153
5.2.3	A Variation .....	159
5.2.4	GDB Threads Command Summary .....	161
5.2.5	Threads Commands in DDD.....	161
5.2.6	Threads Commands in Eclipse .....	161
5.3	Debugging Parallel Applications .....	163
5.3.1	Message-Passing Systems .....	164
5.3.2	Shared-Memory Systems .....	170
5.4	Extended Example .....	171
5.4.1	OpenMP Overview .....	171
5.4.2	OpenMP Example Program .....	172

## **6** **SPECIAL TOPICS** **185**

6.1	What If It Doesn't Even Compile or Load? .....	185
6.1.1	Phantom Line Numbers in Syntax Error Messages .....	185
6.1.2	Missing Libraries .....	190
6.2	Debugging GUI Programs .....	194
6.2.1	Debugging Curses Programs .....	194

## **7** **OTHER TOOLS** **205**

7.1	Making Good Use of a Text Editor .....	206
7.1.1	Syntax Highlighting .....	206
7.1.2	Matching Brackets .....	208
7.1.3	Vim and Makefiles .....	209
7.1.4	Makefiles and Compiler Warnings .....	210
7.1.5	Final Thoughts on a Text Editor as an IDE .....	211
7.2	Making Good Use of the Compiler .....	212
7.3	Error Reporting in C .....	213
7.3.1	Using errno .....	213
7.4	Better Living with strace and ltrace .....	217
7.5	Static Code Checkers: lint and Friends .....	219
7.5.1	How to Use splint .....	221
7.5.2	Last Words .....	221
7.6	Debugging Dynamically Allocated Memory .....	221
7.6.1	Strategies for Detecting DAM Problems .....	224
7.6.2	Electric Fence .....	225
7.6.3	Debugging DAM Problems with GNU C Library Tools .....	228

## **8 USING GDB/DDD/ECLIPSE FOR OTHER LANGUAGES 235**

8.1	Java .....	236
8.1.1	Direct Use of GDB for Debugging Java .....	238
8.1.2	Using DDD with GDB to Debug Java .....	240
8.1.3	Using DDD as a GUI for JDB .....	241
8.1.4	Debugging Java in Eclipse .....	241
8.2	Perl .....	242
8.2.1	Debugging Perl via DDD .....	244
8.2.2	Debugging Perl in Eclipse .....	246
8.3	Python .....	247
8.3.1	Debugging Python in DDD .....	249
8.3.2	Debugging Python in Eclipse .....	250
8.4	Debugging SWIG Code .....	251
8.5	Assembly Language .....	255

## **INDEX 259**
