Name: JONATHAN & KRISTI HURLEY

Date: 3-28-2022

Owner's Printed Name

Name: 

Owner's Signature

To: Adams County Planning

My name is Kristi Hurley. I am applying for a CUP on 3/09/2023 for a small horse training and education stable at my residence of 14583 Cherry St. Brighton, CO 80602. We have 6 horses on 4.92 acres of property.

I was born and raised around horses in Wyoming and have been in the industry my entire life. I teach children and adolescents all aspects of being around horses from; learning how to approach them, safety skills around animals, how to feed, water, groom, interact with, lead, liberty training, I teach them about all tack, how to properly use the tack on your horse, beginning and advanced riding skills.

I work with children of all ages and all spectrums. I see many children with aspergers, autism, downs syndrome, anxiety, ADD, ADHD, depression, Foster Children, and more. I teach children the value of working with animals and how it can help your emotional state. I have been very involved with 4-H my entire life and am a Leader in Adams County 4-H for our Club Boots & Buckles. I work directly with Kenzie Kimmel & Julia Hurdelbrink to help with our youth projects. We are able to teach many of the 4-H fundamentals that we learn from Adams County 4-H throughout my programs throughout the community.

Regarding business practices; We feed our animals twice per day, hay is delivered every 6 weeks, and freshwater is provided to the animals daily. We work closely with Ft. Lupton Animal Clinic to administer care when needed and vaccinations in the spring and fall. Our ferrriers come every six weeks to tend the horses hooves. Our animal waste is recycled daily by grading it into our pastures. Each animal's pens are taken care of daily and we do have a large turnout pasture that is completely safe and fenced for the animals to graze in. Our riding arena and round pen is tilled weekly (weather permitting) and has a sand base to help with erosion, footing and dust. We have purchased monthly service from Spalding Fly Predators which helps to illuminate fly larvae, which in turn, helps illuminate flies during the summer months.

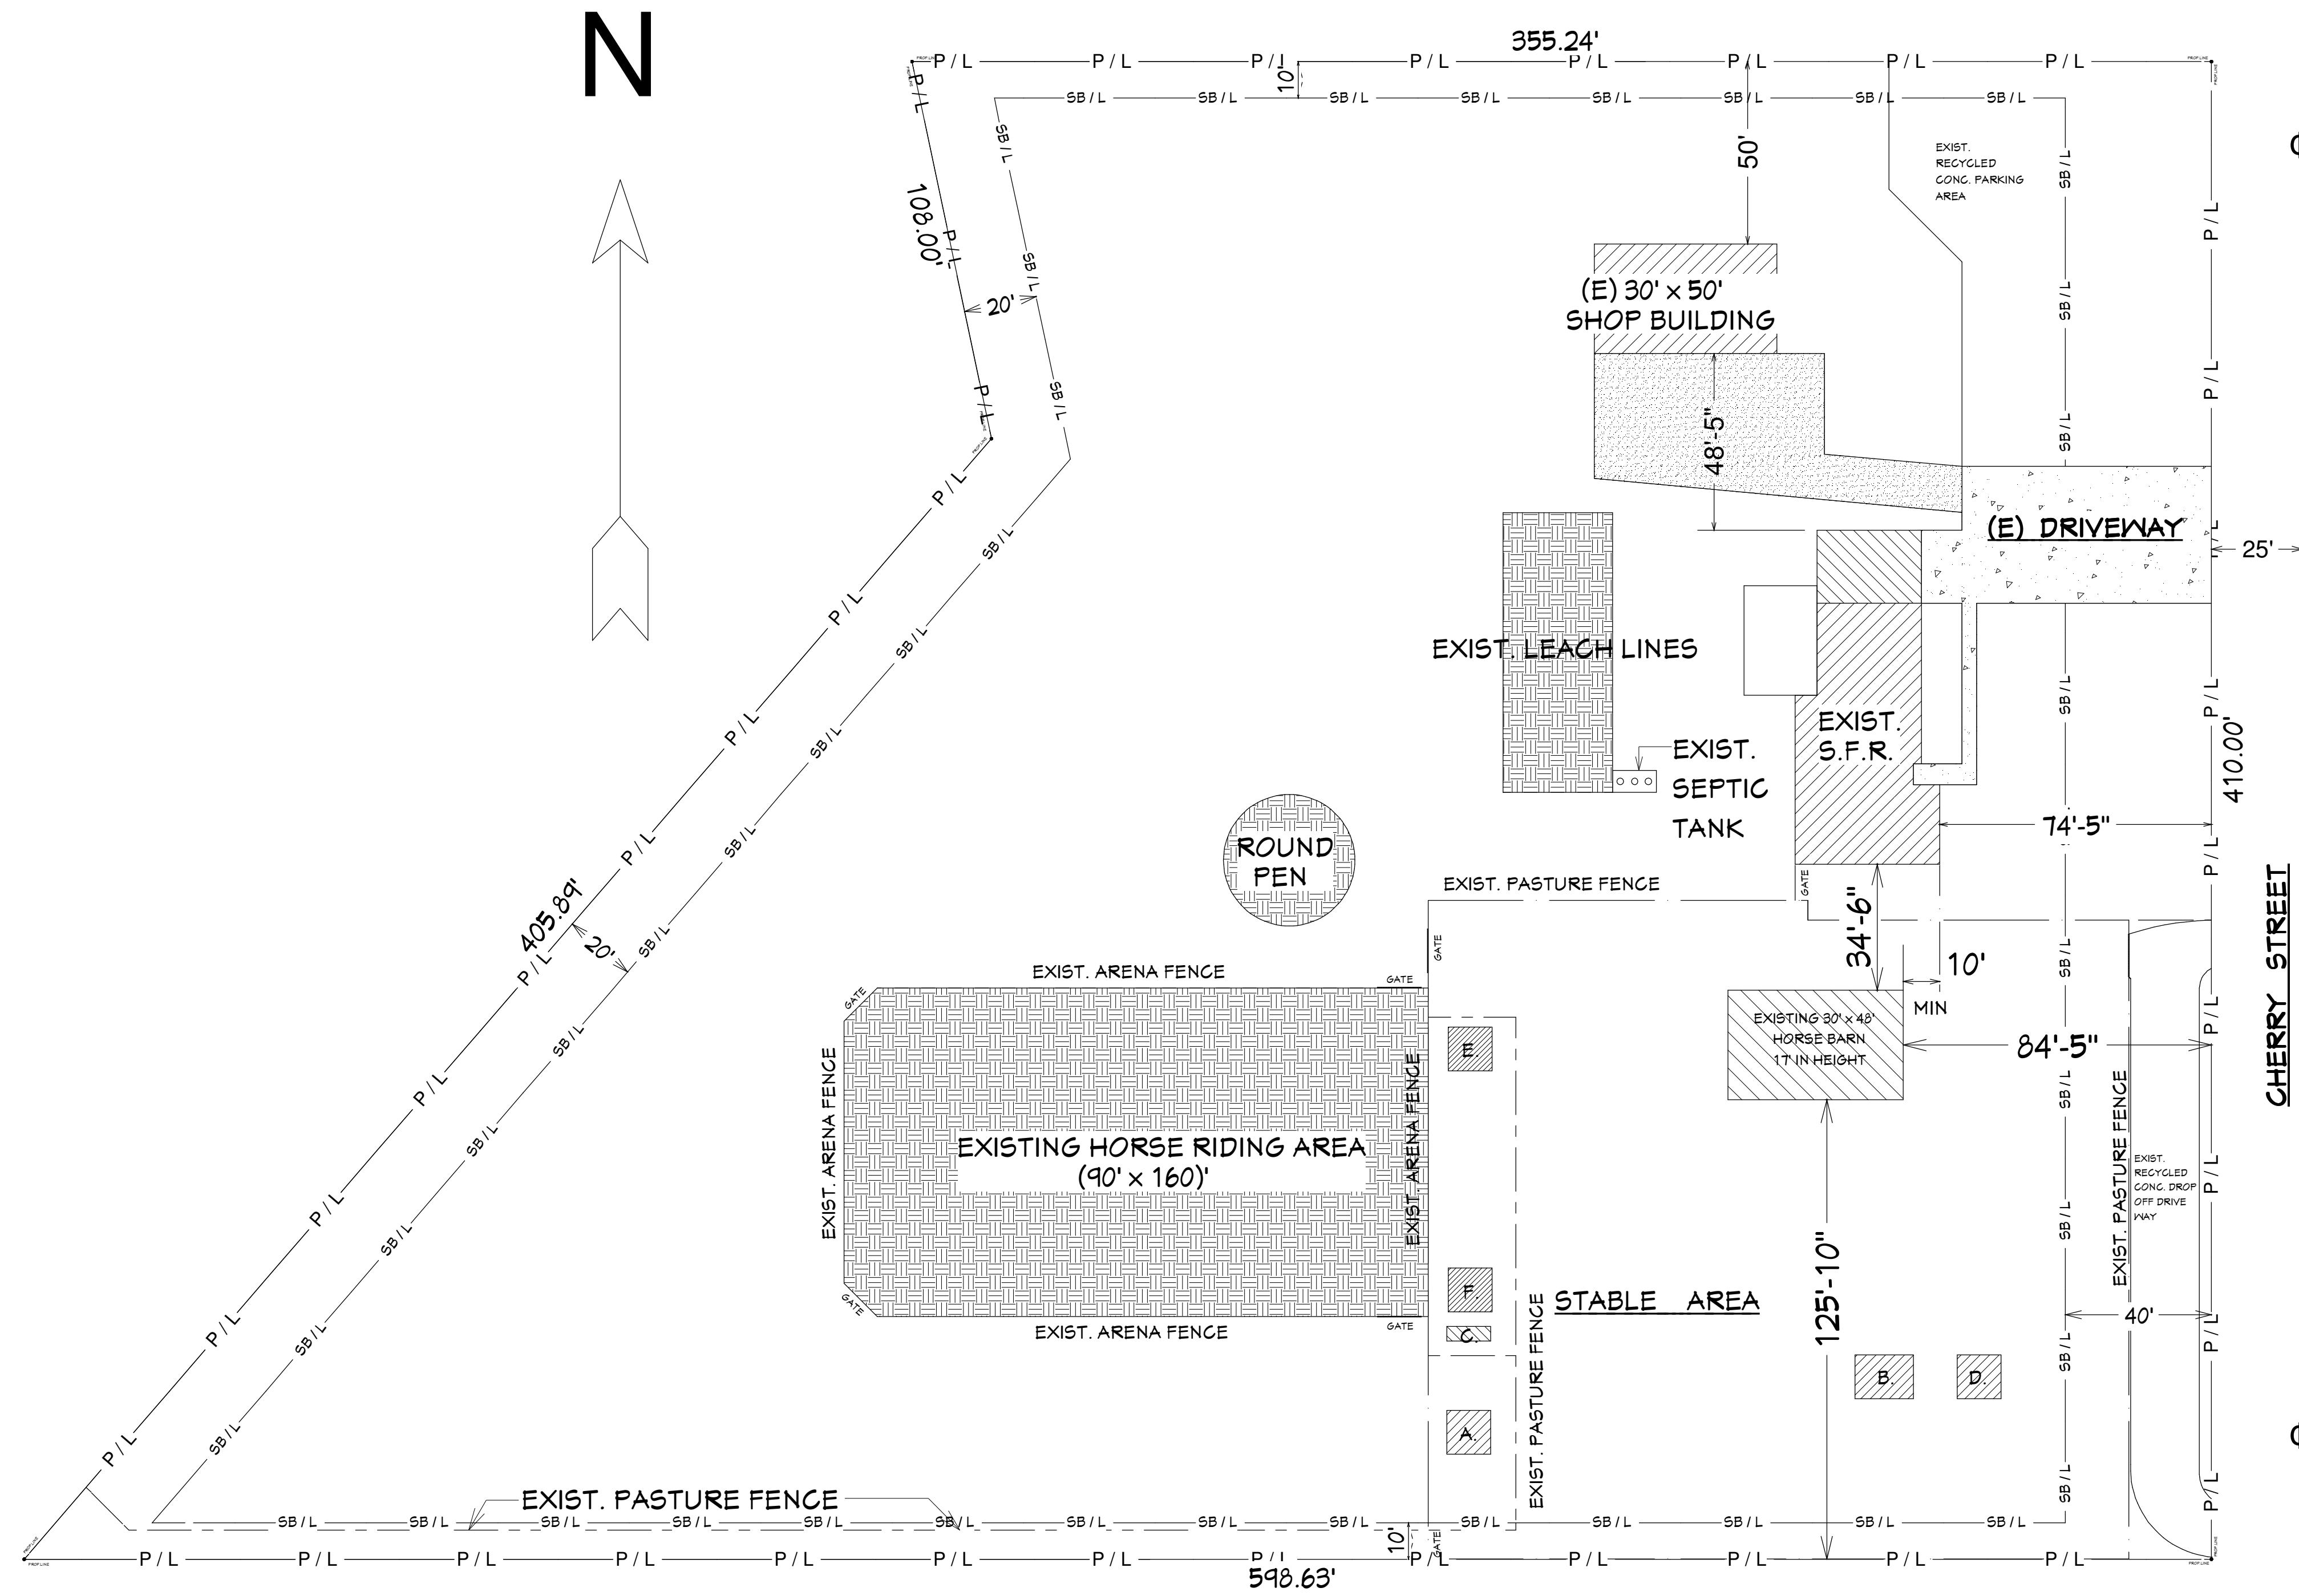

I will not be hosting any riding clinic or horse shows on our property. We have built a drop off zone for children to be dropped in that allows all cars to stay off of our street. We also have extra parking to ensure that all cars are off of the street. Student drop off can include 5-7 cars on our busiest days, however, most days only a few at a time will be parked in our parking lane on our property.

We do alot of community service projects with our students, which teaches them responsibility, respect, communication skills, how to overcome obstacles, and work together for the greater good. Our students are very respectful, courteous, & kind. We work together to keep our neighborhood clean and happy.

I appreciate your time and consideration and believe that what I do as an equine educator and 4-H Leader is incredibly important to the future wellbeing of our children and our community. Animals teach everyone incredible lessons about respect, empathy, kindness, responsibility, social skills, team work, and patience, all while being outdoors away from any type of screen,

social media, etc. I am very passionate about what I do and would love to continue to move forward with helping our community,

Thank you for your time,
Kristi Hurley

START YOUR SUMMER ENERGY SAVINGS PLAN—TODAY.

Before the summer heat hits, act now to reduce your energy use. Sign up for Saver's Switch. It's free and helps us better manage peak electricity demand by cutting back just a little on the time your central air works to cool your home. And because your fan keeps circulating cooled air, most Saver's Switch participants will say they don't even notice when it's on. Plus, you'll receive savings on your electric bill every year you participate in Saver's Switch.

To receive \$40 off your October electric bill, enroll today online at xcelenergy.com/SaversSwitch or call 800-895-4999.

TRI-COUNTY DISTRICT HEALTH DEPARTMENT
PERCOLATION TEST

The purpose of this test is to determine whether or not soil conditions are suitable for the absorption of septic tank effluent. This test is a time measurement of how long it takes one inch of water to seep into a saturated soil at a given level. (If water should go down 1 inch in 15 minutes, we could say that it has a percolation rate of 15 minutes.)

HOW TO PERFORM THIS TEST: The following steps are recommended by the Tri-County District Health Department.

1. A minimum of three test holes are placed uniformly over the absorption field site at the exact depth of the proposed leaching trench or bed.
2. These holes may be bored with an earth auger ranging anywhere from 4 to 12 inches in diameter. A 4 inch auger requires less work and less water to operate.
3. After the holes are bored to the proper depth the bottom and sides of the hole should be scratched with a sharp instrument to provide a natural soil surface and a reliable test. (If this is not done the sides may become "slicked" over and won't allow proper absorption.)
4. All loose earth should be removed and 2 inches of coarse sand or fine gravel placed in the bottom to prevent scouring or clogging by sediment.
5. The holes should then be filled with clear water to at least a depth of 12 inches. The soil should be thoroughly saturated for a period of 4 hours or preferably overnight. This will allow the individual earth particles to "swell" so the earth will most closely resemble an operating sewage disposal system and result in a stabilized percolation rate. In sandy soil "swelling" does not take place and only saturation and a constant rate of absorption is required. At this point your percolation test holes should resemble Diagram "A".
6. After the holes are saturated, 6 inches of water at the leaching depth are timed as they seep out. This should be done by a measurement of the water at regular timed intervals. If the time measurement of the first inch's absorption and the sixth inch's absorption vary more than 10%, this is an indication that the earth was not saturated and the test should be rerun.

HOW TO RECORD THE PERCOLATION RESULTS: For the sake of simplicity the following form is presented. See Diagram "B".

Diagram "A"

Diagram "B"

Depth of Hole	#1	#2	#3
#1	28"		
#2	29"		
#3	28"		

Test Holes

Min. per inch	#1	#2	#3
	44	41	45
	45	40	46
	45	41	46

1. Measuring stick
2. Firm level base
3. 2" of gravel at the proposed depth of drainage field

Percolation Rate = Average time in minutes per one inch water drop

SIGNIFICANCE OF RESULTS

1. If the earth has percolation rate in excess of 60 minutes, it is not suitable for leaching system in that particular earth strata.
2. If the percolation rate is in excess of 30 minutes, the earth is unsuitable for a seepage pit.

PLOT PLAN MUST ACCOMPANY THIS FORM BEFORE PERMIT WILL BE ISSUED.

AVERAGE PERCOLATION RATE = 43.66 Min / inch

TRAFFIC STUDY

SITE: 14583 Cherry St. Brighton, CO 80602

ZONING: A2

EXISTING NEIGHBORHOOD LAND USES: Single family residences with personal farming and ranching. Several properties with livestock and horses.

CHERRY ST. Existing dirt road that is 2,526 FT long dead end.

Traffic study is for a C.U.P. for horse riding stables.

CURRENT ONSITE DEVELOPMENT: Single family residence with a horse barn and outdoor riding arena, round pin, horse shelters. No proposed construction

CURRENT ACCESSIBILITY: The horse area (Southeast side of property) has a circular compacted recycled concrete driveway with parking.

TRAFFIC STUDY DATES: Monday 12-4-23 8am to 5pm, Tuesday 12-12-23 8am to 5pm. Wednesday 12-20-23 8am to 5pm. Saturday 12-2-23 8am to 5pm.

CURRENT STREET TRAFFIC: Traffic counts were taken on a Monday, Tuesday, Wednesday, and Saturday. The traffic counts were taken from 8am until 5pm. The average vehicles per hour were 3 to 5 cars per hour Monday, Tuesday, Wednesday & Saturday. On Saturday the current hourly average increased to 5 to 7 cars per hour.

PROPOSED TRAFFIC INCREASE: The proposed traffic increase on Monday, Tuesday & Wednesdays would be 3 to 5 total cars to drop children off between 10am and 12pm. Saturday's increase would be 1 to 3 cars. Parents usually will pull into the circular driveway and drop off a child and then return 1 hour later to pick up the child.

TRAFFIC CONCLUSION: The total increase in volume on Monday, Tuesday and Wednesday would be 3 to 5 cars to drop off and pick up children between 10am and noon. On Saturdays the increase would be 1 to 3 cars between 10am and noon. The total increase in traffic volume would be 15 to 18 cars per week.
