Preface

The 22nd International Conference on User Modeling, Adaptation, and Personalization (UMAP 2014) was held in Aalborg, Denmark, on July 7-11 2014. UMAP 2014 posters and demonstrations contain original and unpublished accounts of innovative research ideas, preliminary results, industry showcases, and system prototypes, addressing both the theory and practice of User Modeling, Adaptation and Personalization.

A total of 17 posters and demonstrations papers were presented at UMAP 2014. There were 11 posters and 6 demonstrations. A total of 27 submissions were received: 20 poster submissions and 7 demo submissions. Each of them was reviewed by at least three members of the Program Committee. Submissions were assessed based on their originality and novelty, potential contribution to the research field, potential impact in particular use cases, and the usefulness of presented experiences, as well as their overall readability.

We thank all authors for submitting and presenting their works, and members of the Program Committee for providing their time and expertise for reviewing and selecting the papers. All their efforts made UMAP 2014 posters and demonstrations possible.
