Governance and money in the project

Items

Why and how

Money

SFC

Commercial support

Why and how

We get money (donations to opencollective mostly)

We spend money (curl up, pending bug bounty)

Some of us do commercial curl work

Clarifies boundaries

Relieves individuals

Removes having to trust individual humans

Money

8,500 USD in OpenCollective (and counting)

I want to kick off 3,000 USD to a bug bounty program

curl up costs and sponsor deals could've been done this way

Possibly recover some of the money spent on two decades of hosting curl stuff

Project sponsors

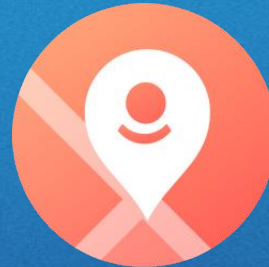

Haxx – sponsors infrastructure (server, Internet, etc)

Fastly – sponsors hosting (CDN fronting)

wolfSSL – sponsors work (employs Daniel)

Silver sponsors

Icons8, Maid2Clean and Talentplot.

Software Freedom Conservancy

US non-profit

Legal “entity” to hold on to money for us

Doesn't affect the daily running of the project

Decisions about money (proposal)

A small team/group

Chaired (initially) by Daniel

Money spent should be in the greater interest of the curl project

Commercial curl support

Done outside of the project

Independent and unrelated of the project

Free for anyone to do

Daniel offers commercial support via
wolfSSL

What do you want to do?

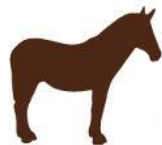

Swag?

Help fund developers to go to curl up?

Do more curl ups?

What else?
