

INSIDE
HIGHER ED

2022 Survey of

Campus Chief Technology/ Information Officers

A SURVEY BY *INSIDE HIGHER ED* AND HANOVER RESEARCH

SCOTT JASCHIK & DOUG LEDERMAN
EDITORS, *INSIDE HIGHER ED*

The Most-Selected

in Higher Ed. ...Again.

2021 marked the second year in a row that Jenzabar led student information system selections in higher ed. Institutions trust Jenzabar to help them navigate the enrollment crisis and address the rapidly changing higher education landscape.

THERE'S A BETTER WAY TO
COMMUNICATE
and engage your students!

With **90% student adoption**, Ready Education's mobile-first solutions integrate key systems in a **secure**, **personalized**, and supercharged student

engagement platform to positively impact retention.

Centralize resources, streamline communication, and improve student engagement.

INTRODUCTION

Inside Higher Ed has collaborated with Hanover Research to conduct its first-ever Survey of Campus Chief Technology/Information Officers.

The survey was administered in August and September 2022. A total of 1,962 chief information or technology officers at public, private nonprofit, and for-profit colleges were invited to participate; Hanover collected 175 fully or partially completed surveys, yielding a 10.9 percent response rate.

The survey is an attempted census of all CIOs/CTOs using the most comprehensive sample information available to target all eligible U.S. colleges and universities from the Integrated Postsecondary Education Data System database. The margin of error for this survey is 7.7 percent, given a total n-count of 175.

All Institutions, by Sector					Public			Private Nonprofit		
	All	Public	Private Nonprofit	For-profit*	Doctoral	Master's/ Bacc.	Associate	Doctoral/ Master's	Master's	Bacc.
Total sample size	175	84	90	1	29	20	35	23	27	39

All Institutions, by Region					
	All	Northeast	Midwest	South	West
Total sample size	175	35	52	59	28

Note: An asterisk () indicates that data is not reported for these groups due to small sample size.*

KEY FINDINGS

- Forty-five percent of technology leaders report to the senior administrative officer at their institution, while most of the rest (40 percent) report to the president or chancellor.
- Nearly two-thirds of CIOs indicate that they are on the executive cabinet or council at their institution, with technology officers at public doctoral institutions (79 percent) far likelier than their peers to answer that way.
- About two-thirds of senior technology officials indicate that their institution has a chief or senior technology officer who is primarily responsible for overseeing cybersecurity. Fewer than half say their institution has an officer who is primarily responsible for overseeing online education (31 percent), innovation (33 percent), and privacy (39 percent).
- About half of CIOs indicate that the total budget for central IT operations and services at their institution for the 2021-22 fiscal year was less than \$5 million. Nearly a quarter of respondents (22 percent) indicate that theirs was between \$5 million and \$10 million. Nearly half of CIOs expect the 2022-23 central IT budget at their institution to be about the same as the 2021-22 budget. More technology leaders (31 percent) expect their budgets in 2022-23 to be higher than expect it to decline (22 percent).
- About 4 in 10 technology leaders rate their institutions' investment in student success and completion as very or extremely effective, and about a third say the same about their technology investments in data analysis.
- Technology leaders report that most IT functions are exclusively managed by the central IT department. However, more than half of CIOs report that hiring of technology employees (52 percent) and applications for academic units (52 percent) are distributed between the central IT department and individual departments.
- About a third of CIOs (34 percent) agree that the central technology unit at their institution behaves more like a utility than a strategic partner. But more than half agree that senior administrators at their institution treat the central technology unit more like a utility than a strategic partner (52 percent).
- Fewer than half of CIOs indicate that digital transformation is a "high priority" or "essential" for leaders at their institution. However, majorities strongly agree that their institution is prioritizing data for student success (57 percent) and leveraging student data for better learning or retention insights (54 percent).

KEY FINDINGS (CONT.)

- Nearly two-thirds of CIOs indicate that their institution has not set specific goals for digital transformation. Of those whose institutions did set specific goals for digital transformation, most indicate that it will take 1-3 years (~88%) to make progress on the most pressing goals.
- The biggest challenges for institutions when it comes to achieving their digital goals are insufficient financial investment and resistance among staff and faculty members, CIOs report.
- Most CIOs indicate that they have migrated their institution's learning management system (LMS) and the customer relationship management (CRM) system to a SaaS-based model. Nearly half of respondents indicate that they migrated human resources management (45 percent) and development office systems (44 percent) to a SaaS-based model.
- Few CIOs report that their institution has made meaningful investments in cutting-edge technologies. Nearly four in 10 (38 percent) say have at least begun investing in virtual reality or immersive learning, while 44 percent report that they are considering investing in adaptive learning technologies.
- Less than a quarter of CIOs are "very" or "extremely confident" that their institution's cybersecurity practices can prevent ransomware attacks. Nearly half of respondents indicate that they are "moderately confident" that their institution's practices can prevent ransomware attacks (51 percent).
- Most CIOs agree that their institution is struggling to hire new technology employees, and nearly two-thirds (62 percent) agree that their institution is struggling to retain its current technology employees. Respondents cite better salaries (99 percent) and more flexible remote work policies at other organizations (53 percent) as the top reasons they are struggling to retain or hire technology employees.
- Nearly 8 in 10 respondents strongly agree that their institution has technology that makes remote/flexible work viable for their overall workforce. Seventy percent strongly agree (23 percent somewhat agree) that employees at their institution expect more flexibility to work when and where they want now than before the pandemic. But only half agree that their institution has policies that encourage remote/flexible work.

KEY FINDINGS (CONT.)

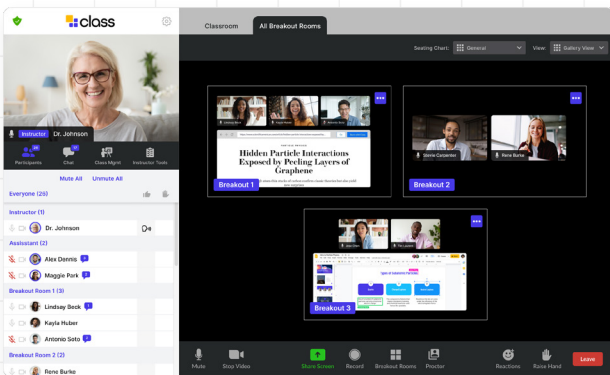

- CIOs are generally satisfied with the quality of the digital learning opportunities at their institution. Most respondents agree that their institution's ability to offer high-quality hybrid (84 percent) and online (78 percent) courses has significantly improved since the pandemic began. More than three-quarters agree that their institution will sustain its ability to offer high-quality online courses (80 percent).
- The majority of CIOs agree that their institution provides technical support for teaching and for creating online courses. Over three-quarters of respondents agree that their institution invests in technology and instructional design resources to improve teaching and learning (78 percent), but only 34 percent strongly agree. Fewer agree that their institution rewards faculty and staff for contributions made to digital pedagogy (35 percent) or consider teaching with technology in promotion and tenure decisions (38 percent).
- Nearly two-thirds of respondents indicate that their institution had a business continuity plan in place before the pandemic began. More than a quarter (27 percent) indicate that it does not have a business continuity plan in place, but intends to create one in the future. About a third of respondents indicate that their institution created an academic continuity plan after the pandemic began (34 percent), while nearly 4 in 10 (39 percent) say their institution still does not have such a plan.
- About three-quarters of CIOs indicate that their institution uses data to support student success. However, fewer indicate that their institution uses data as a means of improving internal processes (54 percent).
- More than half of technology leaders (57 percent) indicate that their institution has a centralized data warehouse to store institutional data.

Reimagine online & hybrid learning

Give students and faculty tools to build connections online with Class.

Classroom View

Enhanced Breakout Rooms

Maximize Engagement

Provide an interactive, connected learning experience with tools to track focus and provide feedback.

Manage Courses

Grade assignments, take attendance, and facilitate group discussions—all without leaving Zoom.

Improve Instruction

Personalize learning in dynamic and engaging ways, such as site-sharing and displaying videos.

Measure Contribution

Track and report on course metrics, including participation and speaking time, by student or the entire class.

“Class has brought the next wave of virtual learning to life. Online education and synchronous learning will only continue to grow in a post pandemic world, and the need for software with tools to enhance the classroom connection digitally is greater than ever.”

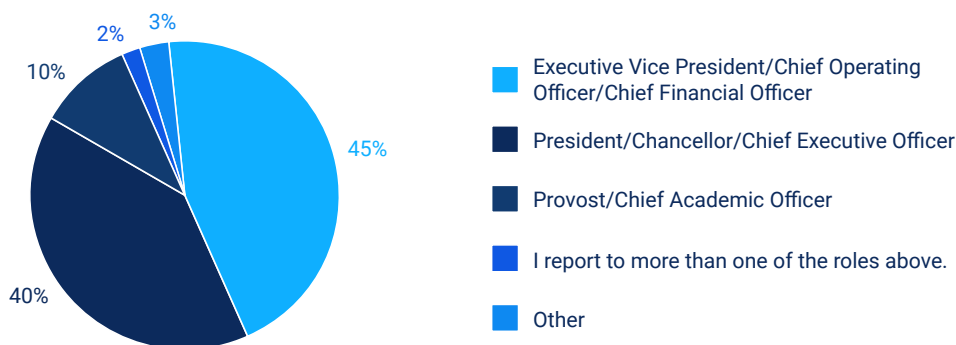

Russell Kaurlo, Vice Chancellor of Information Technology & CIO, University of Denver

Learn more at class.com →

REPORTING LINES

Forty-five percent of technology leaders report to the senior administrative officer (executive vice president/chief operating officer/chief financial officer) at their institution, while most of the rest (40 percent) report to the president or chancellor. Ten percent report to the provost, and 5 percent to someone else.

Nearly two-thirds of CIOs indicate that they are on the executive cabinet or council at their institution, with technology officers at public doctoral institutions (79 percent) far likelier than their peers to answer that way. Most of those respondents (85 percent) indicate that they were added to the executive cabinet/council before campuses closed in March 2020, and 94 percent say they expect to remain on the executive cabinet/council going forward.

Are you on the president's/chancellor's executive cabinet or council at your institution? (n=175)

When were you added to the executive cabinet/council? (n=112)

Do you expect to remain on the executive cabinet/council going forward? (n=112)

Note: Only respondents who reported that they are on the president's/chancellor's executive cabinet or council at their institution saw the bottom two questions.

AREAS OF RESPONSIBILITY

Nearly all CIOs indicate that they provide support for administrative technology, telecommunications and academic technology. More than three-quarters say they support distance/online education programs (77 percent) and media center and services (76 percent).

Fewer respondents at private baccalaureate institutions than in other sectors say they provide support for online/distance education (62 percent) and campus teaching and learning centers (59 percent).

**Which of these academic or operational units do you support?
Please select all that apply. (n=175)**

STRUCTURE, REPORTING LINES AND RESPONSIBILITIES

AREAS OF RESPONSIBILITY (CONT.)

About two-thirds of CIOs indicate that their institution has a chief or senior technology officer who is primarily responsible for overseeing cybersecurity. Fewer than half say their institution has an officer who is primarily responsible for overseeing online education (31 percent), innovation (33 percent), and privacy (39 percent).

Significantly more CIOs in the West (68 percent) than the Midwest (31 percent) report that their institution has a chief or senior technology officer who is primarily responsible for overseeing data/analytics.

Does your institution have a chief or senior technology officer who is primarily responsible for overseeing any of the following areas?

BUDGET AND RESOURCES

2021-22 BUDGET

About half of CIOs indicate that the total budget for central IT operations and services at their institution for the 2021-22 fiscal year was less than \$5 million. Nearly a quarter of respondents (22 percent) indicate that theirs was between \$5 million and \$10 million. More than two-thirds of technology leaders at public doctoral institutions reported budgets of more than \$20 million, while majorities of CIOs at private master's and baccalaureate colleges and community colleges said their budgets were under \$5 million.

About 4 in 10 CIOs (42 percent) report that their institution's central IT budget was cut back during the course of the 2021-22 year.

What was the total budget for central information technology operations and services (e.g., personnel, equipment, operations, projects, software) at your institution for the 2021-22 fiscal year? (n=171)

Did the central IT budget have any cutbacks during the course of the 2021-22 year? (n=171)

EXPECTED 2022-23 BUDGET

Nearly half of CIOs expect the 2022-23 central IT budget at their institution to be about the same as the 2021-22 budget. More technology leaders (31 percent) expect their budget in 2022-23 to be higher than expect it to decline (22 percent).

Public master's/baccalaureate CIOs are the only group that is likelier to expect a decline (35 percent) than an increase (15 percent).

I expect the 2022-23 central IT budget to be... (n=171)

People are the heart of a university. So is IT.

The right technology can help you better serve students, faculty, and staff and reach your institution's strategic goals.

As the business of higher education evolves and digital advances continue to emerge, ensure you are on the leading edge with the experts at Huron.

BUDGET AND RESOURCES

EFFECTIVENESS OF TECHNOLOGY INVESTMENTS

Asked to assess the effectiveness of their institution’s IT investments in various areas, CIOs give the highest rating to their investment in on-campus teaching and instruction (67 percent very or extremely effective), followed by their investment in instructional support services for professors (60 percent) and administrative information systems and operations (56 percent “very” or “extremely effective”).

Far fewer rate as highly effective their institution’s investment in development efforts (32 percent), alumni activities/engagement (28 percent), and faculty research and scholarship (27 percent).

About 4 in 10 technology leaders rate their institution’s investment in student success and completion as very or extremely effective, and about a third say that about their technology investments in data analysis.

How would you rate the effectiveness of your institution’s investment in IT resources and services in the following areas?

SHARE OF MANAGEMENT BETWEEN CENTRAL IT AND INDIVIDUAL DEPARTMENTS

Nearly half of respondents indicate that more than 30 employees are managed by their institution’s central IT department (rather than by individual departments or schools). Further, 40 percent of respondents indicate that no IT employees are managed by individual schools, academic departments, or administrative departments.

About two-thirds of CIOs from public institutions (65 percent) indicate that more than 30 employees are managed by their institution’s central IT department, compared to only 30 percent of CIOs from private institutions.

How many employees are managed by your institution’s central IT department (rather than by individual departments or schools)? (n=165)

How many employees are managed by individual schools, academic departments, or administrative departments (rather than by the central IT department)? (n=164)

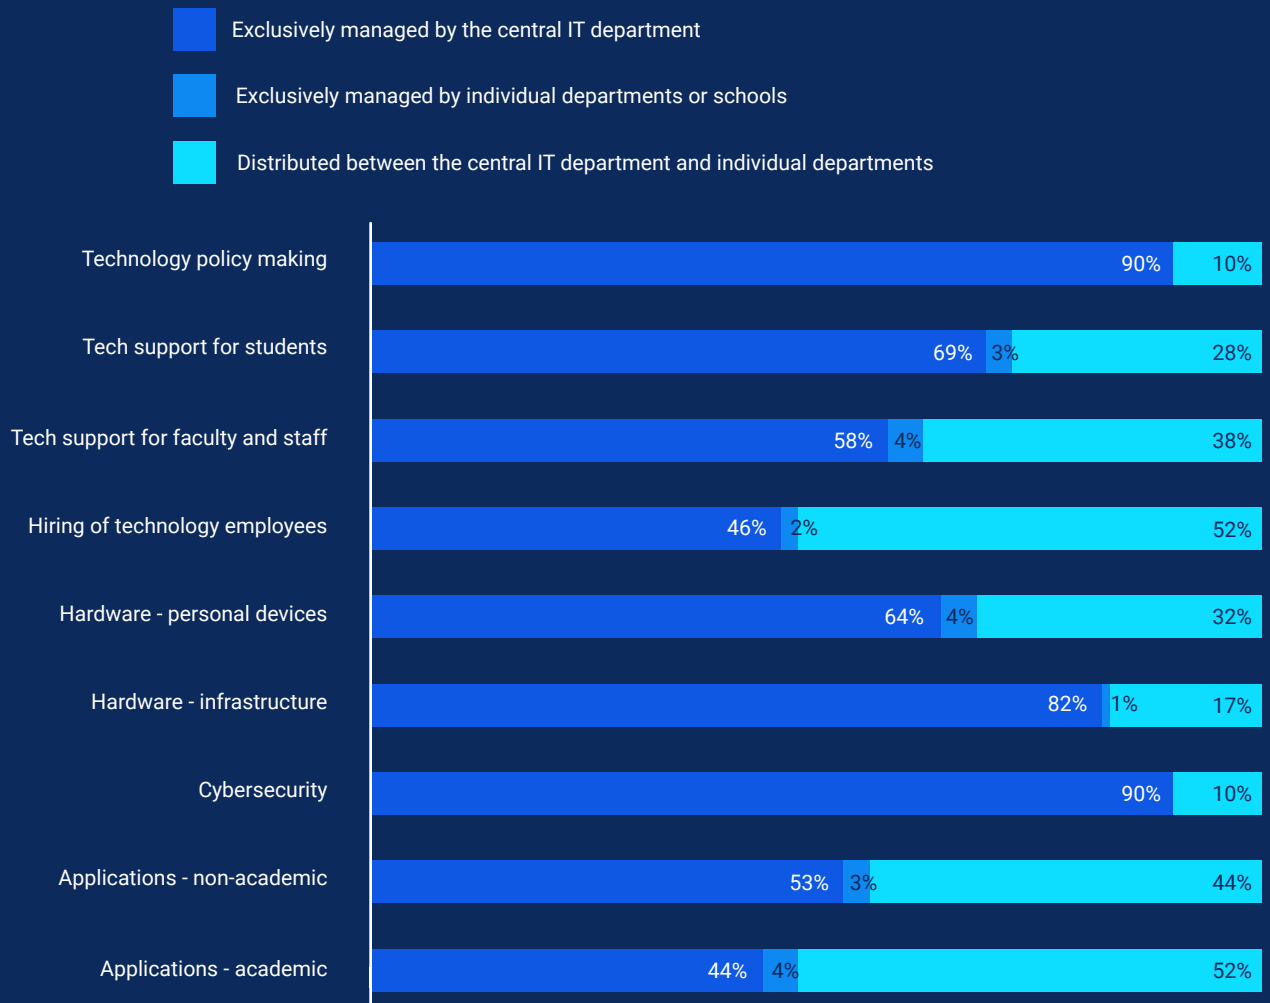

BUDGET AND RESOURCES

SHARE OF MANAGEMENT BETWEEN CENTRAL IT AND INDIVIDUAL DEPARTMENTS (CONT.)

Technology leaders report that most IT functions are exclusively managed by the central IT department. However, more than half of CIOs report that hiring of technology employees (52 percent) and applications for academic units (52 percent) are distributed between the central IT department and individual departments. Very few of the surveyed IT functions are exclusively managed by individual departments or schools (0-4 percent).

More CIOs from private nonprofit institutions indicate that tech support for faculty and staff (75 percent) and tech support for students (85 percent) are exclusively managed by the central IT department than is true for CIOs from public institutions (40 percent and 52 percent, respectively).

To what extent are each of the following IT functions largely managed by your institution's central IT department or by individual departments or schools? (n=99)

PERCEPTION OF CENTRAL IT DEPARTMENT

About a third of CIOs (34 percent) agree that the central technology unit at their institution behaves more like a utility than a strategic partner. But more than half agree that senior administrators at their institution treat the central technology unit more like a utility than a strategic partner (52 percent).

Nearly two-thirds of technology leaders at public master's/baccalaureate institutions strongly or somewhat agree both that the central IT unit behaves like a utility (64 percent) and that senior administrators view it that way (63 percent).

To what extent do you agree or disagree with the following statements related to your institution's central IT department:

IMPORTANCE OF DIGITAL TRANSFORMATION

Fewer than half of CIOs indicate that digital transformation is a “high priority” or “essential” for leaders at their institution. However, majorities strongly agree that their institution is prioritizing data for student success (57 percent) and leveraging student data for better learning or retention insights (54 percent).

How important is digital transformation for leaders at your institution? (n=164)

How much of a priority are the following focal areas in terms of digital transformation efforts?

DIGITAL TRANSFORMATION GOALS

Nearly two-thirds of CIOs indicate that their institution has not set specific goals for digital transformation. Of those whose institutions did set specific goals for digital transformation, most indicate that it will take 1-3 years (~88%) to make progress on the most pressing goals.

CIOs at public master's/baccalaureate institutions are least likely (21 percent) to say their institution has set goals for digital transformation, followed by those at community colleges (31 percent).

Has your institution set specific goals for digital transformation? (n=164)

How long will it take to make progress on the most pressing goals? (n=60)

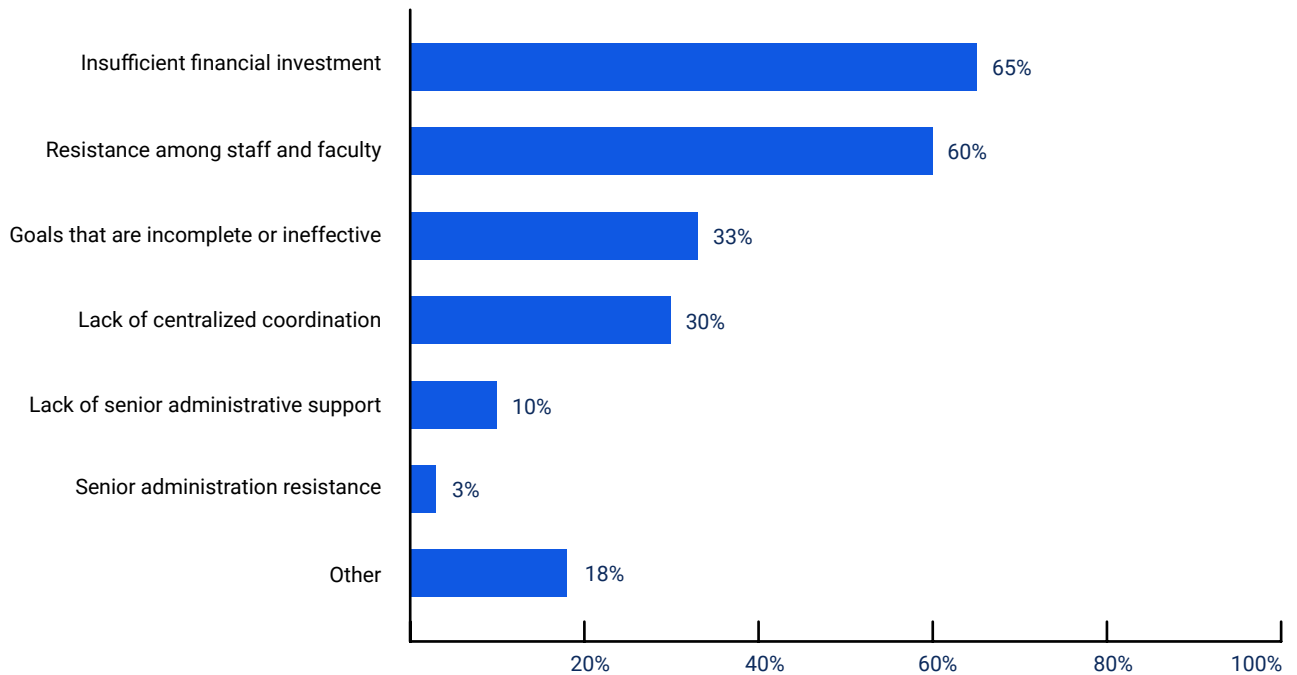

Note: Only CIOs whose institution set specific goals for digital transformation saw the bottom question.

DIGITAL TRANSFORMATION CHALLENGES

The biggest challenges for institutions when it comes to achieving their digital goals are insufficient financial investment and resistance among staff and faculty members, CIOs report. Fewer respondents indicate that “goals that are incomplete or ineffective” (33 percent) and “lack of centralized coordination” (30 percent) are challenges when it comes to achieving digital goals.

**What are your institution’s biggest challenges when it comes to achieving its digital goals?
Please select up to three options. (n=60)**

Note: Only CIOs whose institution set specific goals for digital transformation saw this question.

MOBILE PROCESSES

At least two-thirds of respondents report that applying to the institution, buying a textbook, and paying a tuition bill are “somewhat” or “extremely” easy to do via a mobile device. Slightly fewer respondents indicate that changing an academic course is easy to do via a mobile device (53 percent).

How would you rate the difficulty of the following certain activities via a mobile device?

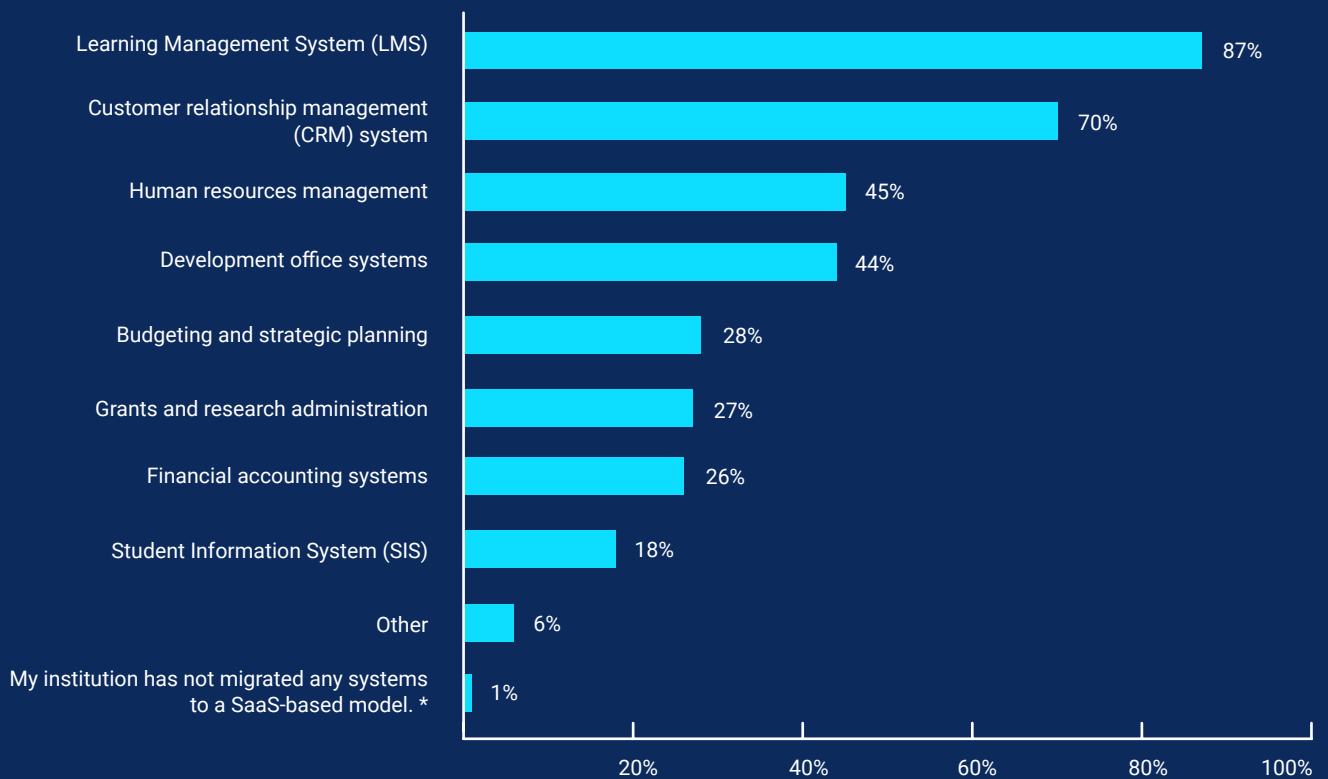

DIGITAL TRANSFORMATION – SAAS-BASED MODEL

Most CIOs indicate that they have migrated their institution’s learning management system (LMS) and the customer relationship management (CRM) system to a SaaS-based model. Nearly half of respondents indicate that they migrated human resources management (45 percent) and development office systems (44 percent) to a SaaS-based model.

Far fewer have made such a move for technologies related to budgeting, grants and research administration, financial accounting, and student information.

Of those whose institution has migrated at least one core enterprise system to a SaaS-based model, most indicate that they have been “very” or “extremely involved” in overseeing that migration (81 percent).

Which of the following core enterprise systems have you migrated to a SaaS-based model? Please select all that apply. (n=164)

To what extent have you been involved in overseeing the migration of these systems to a Software as a Service (SaaS)-based model? (n=162)

Note: Only CIOs who have at least migrated one core enterprise system to a SaaS-based model saw the bottom question.

DIGITAL TRANSFORMATION - CLOUD

Only about one-third of CIOs indicate that it was a “high priority” or “essential” for their institution to migrate their technology services to the cloud following campus closures in March 2020.

Immediately following school closures in March of 2020, how important was it for your institution to migrate your technology services to the cloud? (n=163)

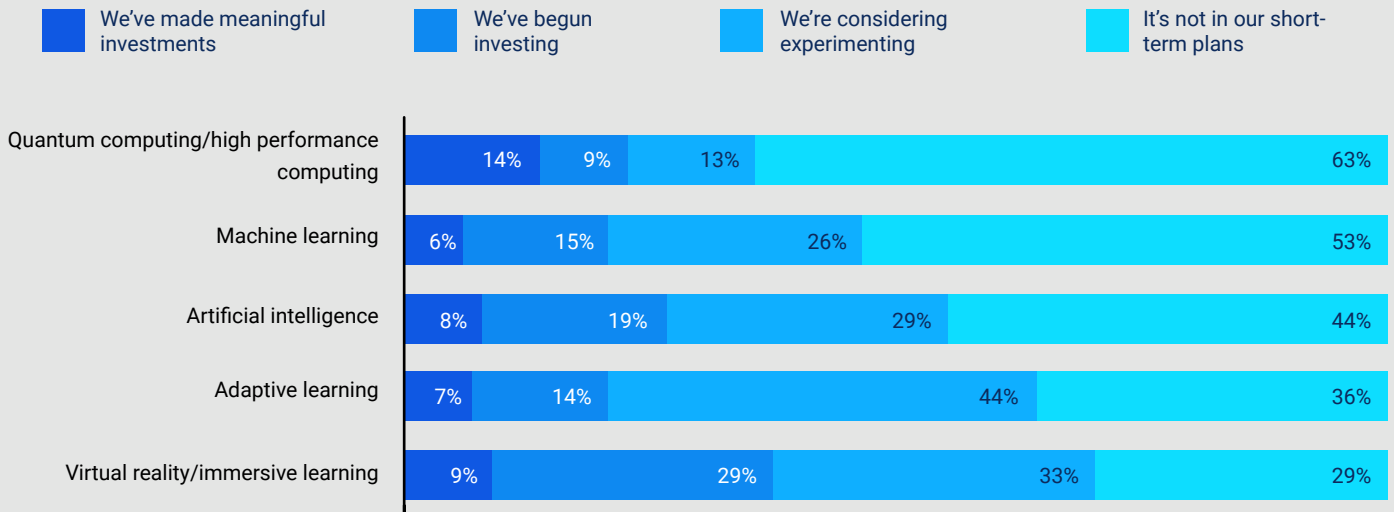

EMERGING TECHNOLOGIES

Few CIOs report that their institution has made meaningful investments in cutting-edge technologies. Nearly four in 10 (38 percent) say they have at least begun investing in virtual reality or immersive learning, while 44 percent report that they are considering investing in adaptive learning technologies.

CIOs at public doctoral institutions are likelier than their peers in other sectors to have made investments in these technologies, especially in high-performance computing (63 percent) and artificial intelligence (26 percent).

Which of the following best describes your institution’s experimentation/ investment in some new technologies? (n=163)

CYBERSECURITY

Less than a quarter of CIOs are “very” or “extremely confident” that their institution’s cybersecurity practices can prevent ransomware attacks. Nearly half of respondents indicate that they are “moderately confident” that their institution’s practices can prevent ransomware attacks (51 percent).

How confident are you that your institution’s practices can prevent ransomware attacks? (n=163)

CYBER INSURANCE

The vast majority of chief technology officers report that their institution has cyber insurance. A majority say that their institution is happy with its coverage. Nearly 3 in 10 respondents (29 percent) say their institution has cyber insurance but wants to further expand its coverage.

Of the small number of CIOs whose institution does not have cyber insurance, half indicate that is because it is too expensive.

Which of the following best describes your institution’s approach to cyber insurance?

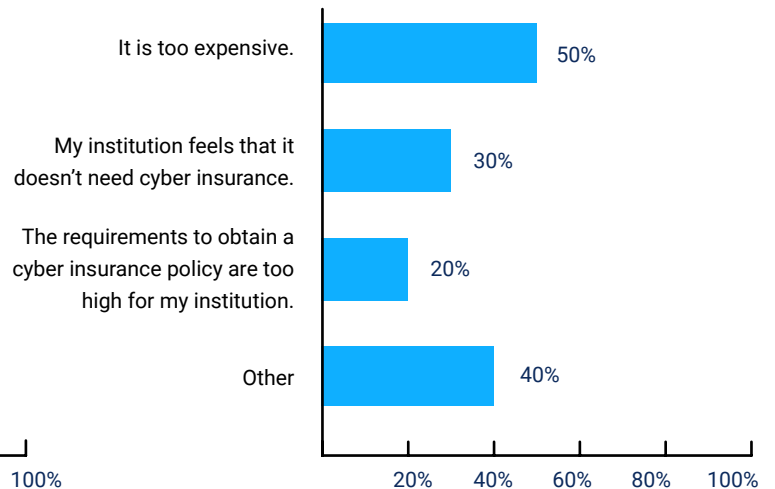

My institution... (n=163)

Why does your institution not have cyber insurance?*

Please select all that apply.

(n=10)

Note: Only CIOs whose institution does not have cyber insurance saw the question on the right.

HIRING AND RETENTION

Most CIOs agree that their institution is struggling to hire new technology employees, and nearly two-thirds (62 percent) agree that their institution is struggling to retain its current technology employees.

Respondents cite better salaries (99 percent) and more flexible remote work policies at other organizations (53 percent) as the top reasons for their difficulty retaining or hiring technology employees.

Technology leaders at public master's/baccalaureate institutions (69 percent), community colleges (67 percent), and in the South (63 percent) are more likely than their peers to cite more flexible remote work policies at other organizations as a factor in their difficulty hiring or retaining technology employees.

To what extent do you agree or disagree with the following statements related to hiring and retention at your institution? My institution is struggling to... (n=162)

Which of the following factors do you believe are responsible for your institution's difficulties retaining or hiring technology employees? Please select all that apply. (n=140)

Note: Only CIOs who at least "somewhat agree" that their institution is struggling to hire or retain technology employees saw the bottom question.

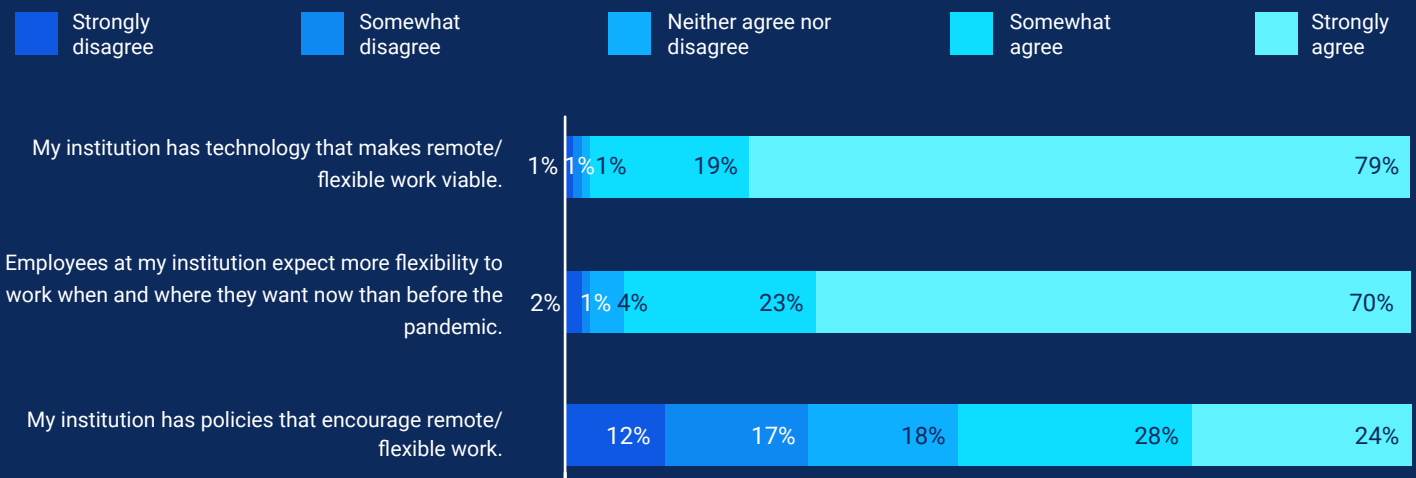

EMPLOYEES AND REMOTE WORK

FLEXIBLE/REMOTE WORK

When it comes to the broad workforce at their institutions, nearly 8 in 10 respondents strongly agree that their institution has technology that makes remote/flexible work viable. Seventy percent strongly agree (23 percent somewhat agree) that employees at their institution expect more flexibility to work when and where they want now than before the pandemic.

About half agree that their institution has policies that encourage remote/flexible work. Technology leaders at public master's/baccalaureate (33 percent) and private master's universities (38 percent) are less likely than those at other institutions to agree that their institutions have flexible-work friendly policies.

For the following question, please keep your institution's overall workforce in mind (not just technology employees). To what extent do you agree or disagree with the following statements related to remote work at your institution? (n=162)

DIGITAL LEARNING

DIGITAL LEARNING OFFERINGS

CIOs are generally satisfied with the quality of the digital learning opportunities at their institution. Most respondents agree that their institution's ability to offer high-quality hybrid (84 percent) and online (78 percent) courses has significantly improved since the pandemic began. More than three-quarters agree that their institution will sustain its ability to offer high-quality online courses (80 percent).

More respondents from public institutions (84 percent) than from private institutions (68 percent) indicate that their institution invested federal CARES Act funds to improve its digital learning infrastructure. More CIOs in the South (88 percent) than CIOs in the West (69 percent) and Northeast (68 percent) agree that their institution's ability to offer high-quality online courses has significantly improved since the pandemic.

To what extent do you agree or disagree with the following statements related to digital learning at your institution?

SUPPORT FOR DIGITAL LEARNING

The majority of CIOs agree that their institution provides technical support for teaching and for creating online courses. Over three-quarters of respondents agree that their institution invests in technology and instructional design resources to improve teaching and learning (78 percent), but only 34 percent strongly agree. Fewer agree that their institution rewards faculty and staff for contributions made to digital pedagogy (35 percent) or consider teaching with technology in promotion and tenure decisions (38 percent).

Nearly three-quarters of CIOs from public institutions agree that their institution acknowledges the time demands of online courses on faculty workload (74 percent), compared to less than half of those from private institutions (48 percent). Additionally, significantly more CIOs in the South (84 percent) than in the Midwest (54 percent) agree that their institution helps faculty and staff stay informed about the latest techniques and technological tools.

To what extent do you agree or disagree with the following statements about your institution's support for using technology in teaching? My institution...

BUSINESS AND ACADEMIC CONTINUITY

Nearly two-thirds of respondents indicate that their institution had a business continuity plan in place before the pandemic began. More than a quarter (27 percent) indicate that it does not have a business continuity plan in place, but intends to create one in the future. About a third of respondents indicate that their institution created an academic continuity plan after the pandemic began (34 percent), while nearly 4 in 10 (39 percent) say their institution still does not have such a plan.

More than half of technology leaders rate the business (63 percent) and academic (56 percent) continuity plans as “good” or “excellent.”

Which of the following best describes your institution when it comes to each of these plans?

- ...had this plan in place before the pandemic began.
- ...created this plan after the pandemic began.
- ...does not have this plan in place but intends to create one in the future.
- ...does not have this plan and does not intend to create one in the future.

How would you rate the quality of the plan(s) you have in place now?

- Very poor
- Poor
- Fair
- Good
- Excellent

Note: Only CIOs whose institution has a business and/or academic continuity plan saw the bottom question.

TECHNOLOGICAL INFRASTRUCTURE

CIOs are satisfied with many components of the technology infrastructure at their institution but with significant variation. Overwhelming majorities of CIOs rate the computer networks and data communication (94 percent), user support services (91 percent), and the WiFi/wireless networks (90 percent) at their institution as “good” or “excellent.” Fewer respondents rate the mobile apps/services for students, faculty and staff (45 percent) and the IT training for students (24 percent) as positively.

Technology training for faculty members, customer-relationship management software and IT accessibility resources earn middling ratings from technology leaders.

How would you rate the following components of the technology infrastructure at your institution?

TECHNOLOGICAL INFRASTRUCTURE (CONT.)

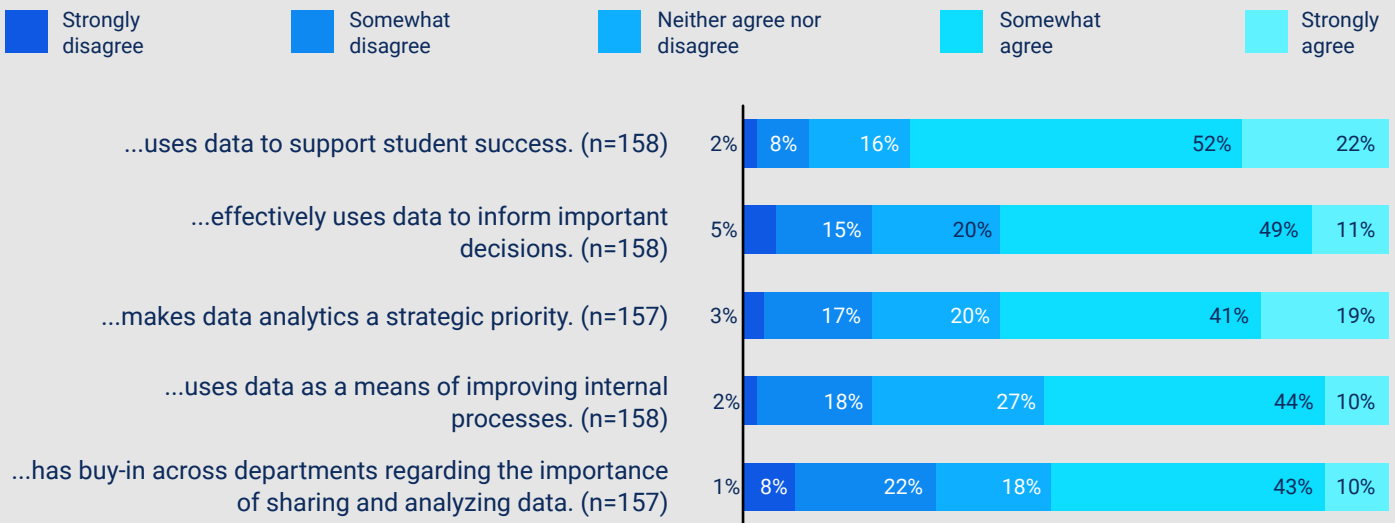

DATA ANALYTICS

About three-quarters of CIOs indicate that their institution uses data to support student success. However, fewer indicate that their institution uses data as a means of improving internal processes (54 percent). And more than half of technology leaders (57 percent) indicate that their institution has a centralized data warehouse to store institutional data.

Does your institution have a centralized data warehouse to store institutional data? (n=159)

To what extent do you agree or disagree with the following statements? My institution...

ACADEMIC TECHNOLOGY

CIOs indicate that they spend significantly more time on academic technology-related matters now than they did before the pandemic. About a third of technology leaders said they spend at least 50 percent of their time on academic technology matters now, compared to 16 percent who said that was the case before the pandemic.

More than half of community college CIOs (57 percent) and 45 percent of technology leaders at public master’s/baccalaureate universities said they spent more than half their time on academic technology.

Approximately what percentage of your time have you spent on academic technology-related matters before the pandemic vs. today?

DETAILED TABLES

To whom do you report at your institution?									
	All Institutions, by Sector			Public			Private Nonprofit

ABOUT *INSIDE HIGHER ED*

Inside Higher Ed is the leading digital media company serving the higher education space. Since our founding in 2004, we have become the go-to online source for higher education news, analysis, resources and services. Our mission is to serve all of higher education - individuals, institutions, corporations and non-profits - so they can do their jobs better, transforming their lives and those of the students they serve. We are proud to have earned the trust and loyalty of our 3.2 million monthly readers by speaking as a fiercely independent voice, providing thoughtful, substantive analysis on the pressing issues facing higher education today.
