EXTENDOMATIC is a monolinear connecting script based on the streamline lettering of the mid–20th century. The typeface juxtaposes flowing, cursive forms with a rigid rectangular skeleton, all connected by an ever–present baseline. In addition to its adjustable weight and slant, Extendomatic's variable font features a tracking axis that extends the baseline as it spaces out the letters.

Available formats:

Desktop	OpenType CFF (OTF)
Web	WOFF, WOFF2
App/E–book	OpenType TrueType (TTF)

Designer: David Jonathan Ross

DJR draws letters of all shapes and sizes for custom and retail typeface designs. A native of Los Angeles, he began drawing typefaces at Hampshire College and joined The Font Bureau in 2007 where he honed his bézier–wrangling skills. Now he publishes visually imaginitive and technically advanced designs at his own foundry, including Fit, Manicotti, Input, Gimlet, and Bungee. You'll find him in Western Massachusetts with his partner Emily and their two dogs, Sophie and Lily.
