

**Sebastian Ochoa Gonzalez, MD**

## Speaker Biography

I am a tenure-track assistant professor at the Baylor College of Medicine in the Division of Immunology, Allergy, and Retrovirology. As an alum of the NIH Allergy and Immunology program, I created and codirect the AI fellowship program's applied immunology course. I developed a curriculum that integrates basic and clinical immunology with genetics, offering an immersive and interactive learning experience. I am deeply passionate about teaching and inspiring the upcoming generation of allergist-immunologists.
