

**David Peden, MD MS FAAAAI**

Speaker Biography

Dr. David Peden is the Andrews Distinguished Professor of Pediatrics and Senior Associate Dean for Translational Research at the University of North Carolina School of Medicine. He is an internationally recognized investigator in the effect of air pollutants on airway inflammation and testing of potential interventions to mitigate the inflammatory effects of ozone, environmental endotoxin and particulate matter. He also is engaged in translational asthma research. Dr. Peden serves as Editor-in-Chief of the Journal of Allergy and Clinical Immunology: Global and is Chair of the Allergenic Products Advisory Committee of the FDA. He has authored 218 peer reviewed publications and is funded by the NIAID, NHLBI, NCATS, DOD and the EPA.
