Dear Dr. Kim:

Re: *Journal of Gynecologic Oncology*

The National Library of Medicine (NLM) uses an NIH-chartered advisory committee, the Literature Selection Technical Review Committee (LSTRC), to recommend journal titles to be indexed in the MEDLINE® database. At the recent LSTRC meeting, the committee recommended your journal for inclusion in MEDLINE. MEDLINE citations are indexed with NLM Medical Subject Headings (MeSH®) and are directly searchable from NLM as a subset of the PubMed® database.

For NLM to include your journal title in MEDLINE, we must receive acceptable XML-tagged citation and abstract data for your journal within six months of the date of this letter. You will find information on the requirements for our XML-tagged format at: <http://www.ncbi.nlm.nih.gov/books/NBK3828> . Send your questions about sending data to NLM to: publisher@ncbi.nlm.nih.gov.

If your journal is in its third volume or less, NLM will index the articles in volumes one through three. If in its fourth year or more, we will begin indexing with the current year.

NLM will add citations for articles in volumes that precede the beginning of indexing if you provide acceptable XML-tagged data. These citations will appear in PubMed but will not be indexed with Medical Subject Headings.

We strongly encourage your journal to archive articles in PubMed Central or another readily accessible archive, and to inform libraries of your archiving policies. If you have not done so already, please review the information in the "MEDLINE Policy on Indexing Electronic Journals" found at www.nlm.nih.gov/bsd/policy/ejournals.html. If your journal becomes electronic-only in the future, it will need to fully comply with this policy.

Please Cancel any complimentary subscription for this journal being sent to NLM.

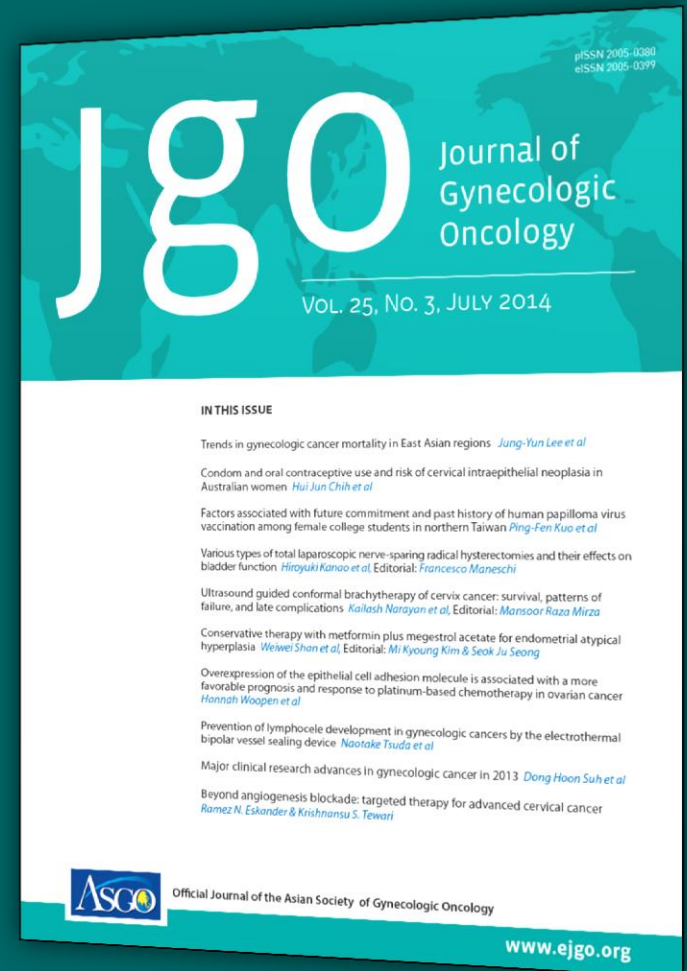

Sincerely,

Joyce Backus
Associate Director
Library Operations
Email: LSTRCinfo@mail.nlm.nih.gov
