Table P-11a. Age-adjusted percent distributions (with standard errors) of type of health insurance coverage for persons under age 65 and for persons aged 65 and over, by selected characteristics: United States, 2017

| Selected characteristic | All persons under age 65 | | | | All persons aged 65 and over | | | | Medicare Advantage ¹ | Medicare only ¹ | Other ¹ | Uninsured ¹ |
|-------------------------|--------------------------|-----------------------|--------------------|------------------------|------------------------------|----------------------------|---------------------------------|----------------------------|---------------------------------|----------------------------|--------------------|------------------------|
| | Private ¹ | Medicaid ¹ | Other ¹ | Uninsured ¹ | Private ¹ | Dual eligible ¹ | Medicare Advantage ¹ | Medicare only ¹ | Other ¹ | Uninsured ¹ | | |

... Category not applicable.

* Corresponding crude percentage for the frequency is considered unreliable, as specified in National Center for Health Statistics Data Presentation Standards for Proportions (available from: https://www.cdc.gov/nchs/data/series/sr_02/sr02_175.pdf), so the frequency is not shown.

¹Based on the question, "What kind of health insurance or health care coverage does [person] have? Include those that pay for only one type of service (nursing home care, accidents, or dental care), exclude private plans that only provide extra cash while hospitalized." Based on a hierarchy of mutually exclusive categories. Persons with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes persons who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for persons aged 25 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷Includes persons who reported a dollar amount or who would not provide a dollar amount but provided an income interval.

⁸"Poor" persons are defined as having income below the poverty threshold. "Near poor" persons have incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons have incomes that are 200% of the poverty threshold or greater.

⁹MSA is metropolitan statistical area. Large MSAs have a population of 1 million or more; small MSAs have a population of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTE: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on responses about all persons in the family. Data came from the Person file and were weighted using the Person weight. Unknowns for the columns were not included in the frequencies, but they were included in the "All persons under age 65" columns. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and current health status. Unless otherwise specified, estimates are age-adjusted using the projected 2000 U.S. population as the standard population and using five age groups: 0-11, 12-17, 18-44, 45-64, and 65 and over. Estimates for age groups are not age-adjusted. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <https://www.cdc.gov/nchs/nhis/SHS/tables.htm>).

Table P-11b. Frequency distributions (number in thousands) of type of health insurance coverage for persons under age 65 and for persons aged 65 and over, by selected characteristics: United States, 2017

| Selected characteristic | All persons under age 65 | | | | | All persons aged 65 and over | | Dual eligible ¹ | Medicare Advantage ¹ | Medicare only ¹ | Other ¹ | Uninsured ¹ |
|-------------------------|--------------------------|-----------------------|--------------------|------------------------|----------------------|------------------------------|--|----------------------------|---------------------------------|----------------------------|--------------------|------------------------|
| | Private ¹ | Medicaid ¹ | Other ¹ | Uninsured ¹ | Private ¹ | Uninsured ¹ | | | | | | |

... Category not applicable.

* Corresponding crude percentage for the frequency is considered unreliable, as specified in National Center for Health Statistics Data Presentation Standards for Proportions (available from: https://www.cdc.gov/nchs/data/series/sr_02/sr02_175.pdf), so the frequency is not shown.

¹Based on the question, "What kind of health insurance or health care coverage does [person] have? Include those that pay for only one type of service (nursing home care, accidents, or dental care), exclude private plans that only provide extra cash while hospitalized." Based on a hierarchy of mutually exclusive categories. Persons with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes persons who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for persons aged 25 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷Includes persons who reported a dollar amount or who would not provide a dollar amount but provided an income interval.

⁸"Poor" persons are defined as having income below the poverty threshold. "Near poor" persons have incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons have incomes that are 200% of the poverty threshold or greater.

⁹MSA is metropolitan statistical area. Large MSAs have a population of 1 million or more; small MSAs have a population of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTE: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on responses about all persons in the family. Data came from the Person file and were weighted using the Person weight. Unknowns for the columns were not included in the frequencies, but they were included in the "All persons under age 65" columns. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and current health status. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <https://www.cdc.gov/nchs/nhis/SHS/tables.htm>).

Table P-11c. Crude percent distributions (with standard errors) of type of health insurance coverage for persons under age 65 and for persons aged 65 and over, by selected characteristics: United States, 2017

| Selected characteristic | All persons under age 65 | | | | All persons aged 65 and over | | | | |
|-------------------------|--------------------------|-----------------------|--------------------|------------------------|------------------------------|----------------------------|---------------------------------|----------------------------|--------------------|
| | Private ¹ | Medicaid ¹ | Other ¹ | Uninsured ¹ | Private ¹ | Dual eligible ¹ | Medicare Advantage ¹ | Medicare only ¹ | Other ¹ |

... Category not applicable.

* Estimate is considered unreliable, as specified in National Center for Health Statistics Data Presentation Standards for Proportions (available from: https://www.cdc.gov/nchs/data/series/sr_02/sr02_175.pdf), and is not shown.

¹Based on the question, "What kind of health insurance or health care coverage does [person] have? Include those that pay for only one type of service (nursing home care, accidents, or dental care), exclude private plans that only provide extra cash while hospitalized." Based on a hierarchy of mutually exclusive categories. "Uninsured" includes persons who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for persons aged 25 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷Includes persons who reported a dollar amount or would not provide a dollar amount but provided an income interval.

⁸"Poor" persons are defined as having income below the poverty threshold. "Near poor" persons have incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons have incomes that are 200% of the poverty threshold or greater.

⁹MSA is metropolitan statistical area. Large MSAs have a population of 1 million or more; small MSAs have a population of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on responses about all persons in the family. Data came from the Person file and were weighted using the Person weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and current health status. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <https://www.cdc.gov/nchs/nhis/SHS/tables.htm>).
