Fig. 1 System view of the visual analytics for a spatio-temporal GDP data of China. **a** Map view allowing the users to select provinces of interest in the map of China. **b** MDS view in which each circle presents a province of China. **c** Temporal view that shows the time-varying features of provinces. **d** Parameter view allowing users to interact with the system

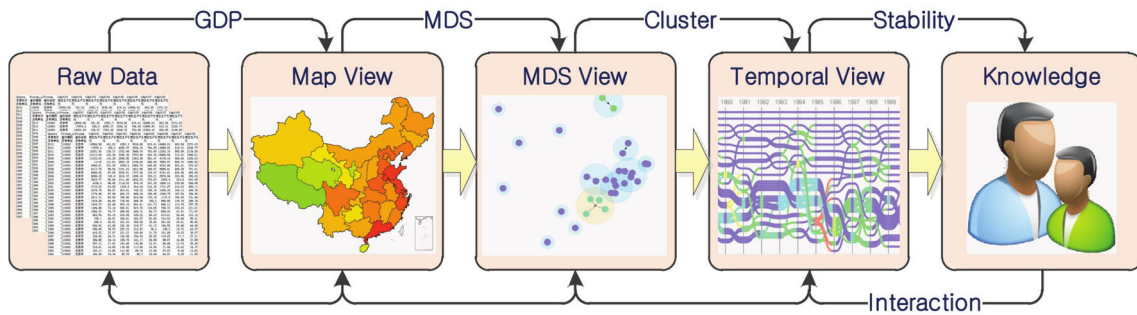

**Fig. 2** Overview of our visual analytics framework

(a) Cluster A   (b) Cluster B   (c) Cluster C   (d) Cluster D

**Fig. 5** Different clusters are highlighted in the MDS view and map view

**Fig. 6** Clusters of interest are highlighted in the temporal view and map view

Fig. 7 Stream lines with the clustering threshold defined as 0

The original article has been corrected.
