In Memoriam: Prof. Varanasi Sitaramaiah

(20 January 1952 – 2 October 2020)

On 2 October 2020, the great Indian mathematician, Professor Varanasi Sitaramaiah, passed away. He was a passionate mathematician, enthusiastic about pure mathematics, and a modest human-being.

His main interest was focused on Number Theory, especially on arithmetic functions. He contributed substantial results, among others, to Narkiewicz's regular convolution, Lehmer's psi-convolution, unitary analogs and asymptotics.

His last passion was the intensive study of bi-unitary multiperfect numbers, working with these numbers all the way. He published these last results in our journal.

We wish to pay tribute to the memory of this great mathematician.
