Niel,

We bought a nice old Victorian house. I am about to line all the walls with book shelves. I quit my job at Waterloo. When would you come to Binghamton and give some talks on coding theory? The math. club would like to hear some words about jobs. What it's like at Bell labs. What you like to think about. Etc.

If Seidel at Yorktown Heights for

5 months I guess you know. By the way, the reason for this note is a sequence you might want.

Acta Arith XXIII (1973)
