Mr N J A Sloane
Bell Laboratories
600 Mountain Avenue
Murray Hill NJ 07974

Dear Mr Sloane

I enclose a reprint of a paper "On a generalization of Pythagoras' theorem" which as you will note develops two integer sequences not given in your esteemed book on the subject, or in Supplement I, namely:

1, 4, 19, 91, ...

and 1, 5, 24, 115, ...

This paper appeared in a Festschrift for Professor Henry Forder published by Auckland University Press, New Zealand.

Very sincerely yours,

Frank A Haight
Frank A Haight
Professor of Statistics
