A 10x10 grid of squares. The squares are arranged in 10 rows and 10 columns. The grid is mostly empty, with the exception of a cluster of four dark gray squares located in the middle-right portion of the grid. A single red arrow points downwards from the center of the bottom-most square of this cluster.

A 10x10 grid of squares. The squares are colored either white or gray. A path is formed by a sequence of gray squares. This path starts at the bottom-right corner (square 9, 9), moves up to (8, 9), then right to (9, 8), then up to (7, 8). From (7, 8), it branches into two paths: one going up to (6, 8) and another going right to (8, 7). From (6, 8), it goes up to (5, 8) and then right to (7, 7). From (7, 7), it goes up to (6, 7) and then right to (8, 6). From (8, 6), it goes up to (7, 6) and then right to (9, 5). From (9, 5), it goes up to (8, 5) and then right to (10, 5). Finally, it goes up to (9, 5), which is the top-left corner.
