

Illustrating A346838 and A000111.

The signed André function.

$$\mathcal{A}_s(s) = ie^{-\frac{1}{2}i\pi s} (\text{Li}_{-s}(-i) - e^{i\pi s} \text{Li}_{-s}(i))$$

The André function $\mathcal{A}(s)$ compared with $|\mathcal{A}_s(s)|$.

$$\mathcal{A}(s) = i^{s+1} \text{Li}_{-s}(-i) + (-i)^{s+1} \text{Li}_{-s}(i)$$
