(54) Title of the Invention: **A method of monitoring product identification and apparatus therefor**
Abstract Title: **A method of monitoring product identification and apparatus therefor**

(57) A method of monitoring product identification at a transaction terminal by sending either visible light signals, near infra-red light signals or wireless signals to a recording device that records video footage of a transaction terminal in conjunction received product identification information. A system for effecting the method along with light based and wireless transmitting units are disclosed.
