(54) **Packaging container.**

(57) This invention relates to a packaging container (1) having flexible walls (2) made of plastic film or paper. The web material which constitutes the walls (2) has been provided with seam welds or adhesive seams (3, 4, 5) to form the closed container (1). The container (1) has a filling opening (6), which is adapted to be closed and in which a valve (6) is disposed, which is closed and maintained in a closed state under the pressure of the material which has been filled into the container. The valve (7) preferably consists of a flexible tubular member (8), which contains the filling opening (6).
