CHOOSE MONIER

At Monier we've been helping kiwis build homes for over 100 years, homes which are still going strong today.

We're proud to manufacture the best exteriors for homes and we're proud to be New Zealand made. At Monier Roofing, we offer classic and contemporary concrete tile profiles with a wide range of colours to choose from. We want to make selecting a roof tile easy.

Be sure to ask for information on all our product ranges:

- › Monier Terracotta Roofing Collection.
- › Monier Solartile – Integrated Modular Photovoltaic Flat Tile System
- › MySteel Roofing Collection.

CHOOSE CONCRETE ROOFING

CHOOSE QUALITY

- › Made in New Zealand.
- › 50 year guarantee.
- › Tile specifications are checked monthly and wind tunnel tests are conducted every 6 months.
- › Manufactured and installed to New Zealand Standards.

CHOOSE PEACE OF MIND

- › Concrete roofs don't rust - particularly important in the salt-laden coastal locations of New Zealand.
- › Concrete roofing performs better than most roofs in high wind zones.
- › Concrete roofs are quieter. They reduce noise by an average 30 decibels.
- › Concrete roofs are quiet when it rains or hails and work well to create a barrier to noise in areas of traffic and high density living.

CHOOSE SAFETY & WARMTH

- › 40% of the heat in a house is lost through the roof. The Thermal Mass of concrete roofs are effective at reducing heat loss.
- › Concrete roof tiles are naturally inert and the drinking water collected from them will not contain zinc or aluminium ions.
- › The laps in a concrete tile roof allow the roof space to breathe so moisture can escape.

CHOOSE DESIGN BRILLIANCE

- › The design load of a concrete roof is only approximately 30% more than a lightweight roof. Additional truss costs, if any, are minimal.
- › There is almost no thermal expansion or contraction with a concrete roof.
- › Low maintenance.
- › The tile body makes the tile waterproof - not the coating.

Monier concrete roof tiles are manufactured from durable concrete that strengthens over time. Our **CAT Colour** application technology layers colour on the surface of the tile, resulting in deeper, richer, more consistent colour. What's more, **CAT Colour** is water-based, making this innovative technology gentler on the environment.

▶ Visit the Monier Online Visualiser at: visualiser.monier.co.nz

There are endless options when building a home – “How will this look with that?” and “What colour is best?” The Monier Visualiser helps make decisions easy by letting you mix and match colour schemes. You can choose from a range of tiles, fascias and gutters right through to bricks, mortar, joinery and even door colours. Go to monier.co.nz to get started.

● Choose a house

● Let's start with the roof...

● ...choose by profile then colour

● Next, choose bricks & mortar

● then fascia/gutter, joinery and garage door

IMPORTANT INFO

The performance of Monier concrete tiles is guaranteed for 50 years – see guarantee details. However, as a purchaser of Monier concrete tiles, it is important to understand their designed performance.

Concrete roof tiles are created from the controlled formulation of raw materials, extruded under high pressure, to achieve the tile's strength and resistance to water penetration. Colour applied to the surface of the roof tile, using Monier's Colour Application Technology (CAT Colour), is purely decorative and with atmospheric conditions will fade over time. Each roof tile's colour may vary in shades throughout the roof.

When first installed, concrete roof tiles may experience some discoloration of lime salts to the surface. This is known as efflorescence. This condition is usually temporary. All roofs are expected to progressively return to an even appearance over time. All roof tiles will contain small blemishes. During transportation and installation other small blemishes such as scuffing and chip marks may occur. Small blemishes will not detract from the weather proofing qualities and performance of roof tiles and should not be seen as a product fault. Monier does not guarantee tile colour.

Colour Matching

Colours have been reproduced as faithfully as possible, however actual tile colours may differ to varying degrees. We urge all customers to view tiles on display before making a decision.
