## SECTION 4: FIRST AID MEASURES

---

<b>Swallowed:</b>	Give water to drink.
<b>Eye:</b>	Flush thoroughly with copious amounts of running water. If symptoms persist, seek medical attention.
<b>Skin:</b>	Wash thoroughly with soap and water.
<b>Inhaled:</b>	Remove to fresh air.
<b>Advice to Doctor:</b>	Treat symptomatically. People with diabetes may need stabilisation.

---

## SECTION 5: FIRE FIGHTING MEASURES

---

<b>Specific Hazards:</b>	Incompatible with strong oxidising agents.
<b>Flammability:</b>	Low, product will burn in surrounding fire situation.
<b>Extinguishing Media:</b>	Water, dry chemical, carbon dioxide, BCF and foam.
<b>Hazards from combustion products:</b>	With heat, product burns/oxidises to form carbon, carbon monoxide and or carbon dioxide, and smoke.
<b>Special protective precautions and equipment for fire fighters:</b>	Standard fire-fighting precautions applicable.
<b>Hazchem code:</b>	None allocated

---

## SECTION 6: ACCIDENTAL RELEASE MEASURES

---

**Spills:** Wet sweep, vacuum or pump into containers. Wash area with water. Notify any relevant waste or environmental authority.

---

## SECTION 7: HANDLING AND STORAGE

---

**Handling:** Material can ferment if excessive moisture contamination is allowed. Fermentation can yield carbon dioxide with possible traces of ethanol or volatile fatty acids (e.g. acetic, propionic, lactic, or butyric) and if exposed to a spark or flame may result in an explosion. These conditions should be avoided. If maintenance of tank requires entry by personnel, confined space precautions should be complied with. Insufficient oxygen may be present in vessels containing the product due to the generation of carbon monoxide during fermentation.

**Storage:** This product should be stored in its factory packaging in a dry area. Invert Syrup/Golden Syrup/Treacle in bulk should be stored in a vented tank designed to contain a material with a specific gravity of 1.3 or greater. Localised microbiological deterioration may start in areas where the liquid becomes diluted. Storage above 40°C can lead to spontaneous decomposition.

---

## SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

---

<b>Exposure Standards:</b>	<b>National Occupational Exposure Standard (NES) Australian Safety and Compensation Council, ASCC</b> (formerly NOHSC) None allocated
<b>Engineering Controls:</b>	General room ventilation should be adequate, but local mechanical ventilation may be required if liquid mists are generated, particularly in confined spaces. Work areas should be cleaned regularly by wet sweeping or vacuuming.
<b>Ventilation:</b>	
<b>Personal Protection</b>	If engineering controls and work practices are not effective in controlling exposure, then personal protective equipment may be required.
<b>Skin Protection:</b>	Direct skin contact should be avoided by wearing long sleeved shirts and long

	trousers, a cap or hat, and gloves (PVC coated fabric or equivalent AS 2161). Work clothes should be washed regularly.
<b>Eye Protection:</b>	Ventilated non-fogging goggles (splash resistant AS/NZS 1336) should be worn if liquid mist is generated.
<b>Respiratory Protection:</b>	An approved particulate respirator conforming to Australian Standards AS/NZS 1715 and AS/NZS 1716 should be worn when working in liquid mists or dusts. Respirators should be correctly fitted, maintained in good condition, and kept in clean storage when not in use. Replaceable filters and cartridges should be replaced regularly in accordance with the manufacturers' guidelines and Australian Standards AS/NZS 1715 and AS/NZS 1716. Use only respirators that bear the Australian Standards mark and are fitted and maintained correctly, and kept in clean storage when not in use.
