Chrome Enterprise Recommended Solution Overview with **EveryonePrint**

Make print perform in the cloud with EveryonePrint's easy to deploy, scalable and flexible Hybrid Cloud Platform

Hybrid Cloud Platform (HCP) is Chrome Enterprise Recommended, meaning you can confidently migrate print to the cloud, with no compromise on security, usability or manageability.

Eliminate print servers, lessen the load on IT and lower the cost of print. With HCP, you can scale your consumption up and down according to business needs and simply pay for the licenses you need.

One cloud service, one global pull queue and one full featured single print driver that's compatible with all printer brands, makes it possible for everyone to enjoy a range of flexible printing options, such as direct print, secure print and finishing options.

Discover the benefits

Simplify print management and enhance the user experience

Deploy and manage the entire printing infrastructure from a single pane of glass. Adding or removing printers takes seconds...and all updates are immediately available to users.

ChromeOS users enjoy **the same full-featured range of flexible printing options on all platforms.** Single sign-on via Google Workspace helps increase productivity, while keeping data secure and HCP's location-aware functionality automatically discovers and shows available printers, allowing users to print immediately, wherever they are.
