

203.10 - Reference Points (solid forms)

This moderate purity SRMs is intended for use in preparing reference point devices and for calibrating thermometers, thermocouples and other temperature measuring devices.

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit of Issue	Temperature (in °C)
742	Aluminum Oxide Pyrometric Standard	10 g	2052

-
- Certified values are normal font
 - Non-certified or reference values are italicized
 - Non-certified values in parentheses are for information only
