

Step into the light

Zendesk Sunshine™ is an open, flexible CRM platform. Connect all your customer data for complete context—wherever it lives—and give developers and admins the tools they need to build the best customer experiences.

Give agents a complete view of the customer

Bring together your data to give your agents a single pane of glass to focus on the customer conversation, with an enriched agent workspace to make better decisions, and apps to automate repetitive processes.

Build experiences as unique as your customer

Provide custom support experiences tailored to your customers, no matter where they are on their journey, surfacing content, and triggering activities and workflows unique to them.

Shift relationships from reactive to proactive

With real-time customer data, agents can anticipate customer needs, resolve issues faster, and trigger outreach, deferring to a lower cost of service channel.

“Zendesk is a platform that is really enabling us to focus on our customers.”

FOR CX LEADERS

Better customer relationships

Put people—not legacy CRM—at the center of your business. Sunshine gives you the flexibility to identify, understand, and segment your customers for your personalized experiences.

FOR CIOs

All your customer data, connected

Take back control of your customer data. Sunshine is an open platform designed to work with all of your business applications, so you can capture every customer interaction, no matter where it comes from.

FOR DEVELOPERS & ADMINS

App creation, at your command

Sunshine gives you the freedom to build modern customer applications your way. User your favorite tools for complete control, with the flexibility of an open, standards-based platform.
