

Academic Memorandums of Understanding

Working Together to Share our Strengths

Importance of MOUs

Provides critical partnerships for projects & program implementation

Provides valuable opportunities for underserved student populations

Effective channel for staff recruitment

Exposes CARB staff to fresh perspectives, new approaches & emerging methods applicable to their work

Background

- Academic relationships through research efforts and student assistants
- CARB Southern California Headquarters relocation to Riverside
 - Strong community partnerships with City, County, Chamber and local academia
 - Aiming to promote air quality and climate change leadership

Pilot MOUs

- The academic MOUs began as pilots that were signed in 2019 with RCCD, UCR & RUSD.
- Intentions were to expand to other academic institutions to promote education and career pathways in the area of air quality and climate change within the broader Riverside area.

Activities & Implementation

Air Quality and Climate Change Career Pathways Development

Education through Curriculum Development & Teaching Opportunities

CARB Workforce Development & Training Programs

Student Internships/Curriculum Credit Programs

Moving Forward
