Subject: 5 January Evening Update

All,

The information contained in this update is gathered through open sources for situational awareness of events that may lead to potential violence.

At this time we have no reporting of planned violence or credible threats to Federal facilities

Federal facilities.

There have been several additions since the last update. Of note is that the WSFC IAs have scaled back their concerns about events scheduled for Olympia tomorrow due to calls from 'left' politically aligned groups to avoid the Capitol Campus area and confrontations with the 'right' wing groups. Also, they have monitored social media calls from the 'right' to not 'open carry' or otherwise bring weapons to the gatherings on the Campus.

WSFC IAs have also noted comments by some Washington State residents planning to travel armed to Washington D.C. for tomorrow's protests there. So, a head's up that there may be incoming requests for checks should any of them end up in reporting.
