

A low-angle photograph of a Gothic-style brick building, likely a church or university hall, with intricate stonework and spires. The building is bathed in warm, golden light, suggesting late afternoon or early morning. The sky is a clear, pale blue. In the foreground, the dark green leaves of trees are visible, partially obscuring the base of the building.

MARQUETTE UNIVERSITY

President's Report

2009

- 2 A Letter from the President
- 4 Fiscal Review
- 10 Investment Overview
- 16 Financial Statements
- 18 Board of Trustees
- 20 Marquette Moments

with powerful gifts com

M A J O R H I G H L I G H T S

A special initiative that raised \$1.1 million in less than six months to provide additional **scholarship aid assistance** for students and families whose financial circumstances suddenly shifted because of the economic downturn. The funding helped 200 students remain at Marquette through the spring 2009 term.

Another record year for new student applications, almost 18,000 for fall 2009, up 17 percent from the prior year.

nes great responsibility

Moving forward with **major capital projects**, including Eckstein Hall, the new Law School building, and Zilber Hall, the new student services and administrative office building, and preparations for the College of Engineering Discovery Learning Complex.

Opening a renovated **student residence hall** for sophomores named for President James McCabe, S.J., whose commitment to enrolling women continued the university's founding mission of providing educational access to all who seek it.

Planning for the **Centennial Celebration of Women at Marquette** to recognize our historic role as the first Catholic university in the world to offer coeducation in undergraduate programs.

dear friends,

I write to you as Marquette University closes another year, one that was characterized by record enrollment for the freshman class, a considerable increase in the number of current students in need of additional scholarship aid to continue at Marquette and some outstanding examples of our heightened role in regional economic initiatives. We also kicked off our yearlong Centennial Celebration of Women at Marquette to properly mark the university's historic role in this revolutionary change in Catholic higher education. The admission of women in 1909 is unquestionably among Marquette's top historical footprints as a leader in making higher education accessible to all students who seek it as well as a point of pride for those of us who love this university. This year's 40th anniversary of the Educational Opportunity Program provided yet another moment for celebrating our commitment to educational access.

Since our efforts as a university community are primarily in the service of students, I'll begin there. Once again we received a record number of freshman applications – this year almost 18,000, up 17 percent from last year – demonstrating the high interest in Marquette, and in late August we welcomed approximately 1,950 freshmen. Academically, they constitute one of the strongest entering classes we have ever enrolled, and among them are 61 valedictorians and about 440 first-generation college students.

Providing deserving students with access to a rigorous education has always been a key priority for Marquette. This year's challenging economy and the resulting sudden and unexpected changes in family circumstances caused prospective students and a good many current students to seek larger amounts of scholarship aid. Given the priority I mentioned, the university's response was prompt and generous. First of all, we made available to students an additional \$4 million in scholarship aid. Then the Board of Trustees launched a scholarship initiative to help our families bridge the gaps that developed between what they could afford to pay and the actual cost for students to continue at Marquette. The Board called this initiative the "Bridge to the Future," a perfect metaphor for the effort that in difficult times has so far raised more than \$1.1 million and helped nearly 200 current students to remain at Marquette. In addition, the Office of Student Financial Aid worked with close to 400 students last year specifically to address their or their family's changing finances, and already this year that number has increased by more than 40 percent. Never before in my time as president has the need been this urgent. Thankfully we received, and continue to receive, many wonderful and generous responses from alumni and university friends who want to help our students complete their Marquette degrees.

Rev. Robert A. Wild, S.J.

Faculty researchers, and Marquette as a whole, are contributing to important regional economic initiatives. For example, Marquette is a regional partner in the Milwaukee 7 Water Council, a consortium connecting local corporations with academia in an initiative focused on leveraging one of the region's most important assets, fresh water. Marquette has also joined other universities in forming the Southeastern Wisconsin Energy Technology Research Center to develop research in the energy field that can foster economic growth. This year as well Marquette celebrated the achievements of faculty members Dr. David Baker and Dr. John Mantsch, whose research efforts resulted in completion of a license agreement to develop and commercialize chemical compounds that have shown promise as a novel treatment for schizophrenia and other central nervous system conditions. And the College of Engineering announced a third faculty chair, this one in secure and renewable energy systems, that was generously funded by alumnus Thomas Werner, Eng '86, and his wife, Suzanne.

A number of quite new and innovative academic programs are flourishing as each of our 11 colleges works to fulfill the expectations students have of a top university. In addition, Eckstein Hall is moving rapidly toward completion. When finished in summer 2010, this extraordinarily beautiful building on

Tory Hill will provide a wonderful new home for the Law School. By the time you receive this Annual Report, our new student services building, Joseph and Vera Zilber Hall, will be open and in full operation. Another project that is generating tremendous excitement is the College of Engineering's Discovery Learning Complex. Our Board of Trustees has approved moving ahead with the first phase of construction of this \$100 million project. We expect to break ground in spring 2010 with initial occupancy planned for August 2011.

None of these good things would have been possible without the extraordinary generosity and commitment of Marquette's alumni and friends, and we are resolved to be vigilant in stewarding those gifts wisely and to look for further ways to ratchet up the quality of Marquette's teaching and research, our commitment to our Jesuit and Catholic character, and the strength of our financial resources.

As always, thank you for your help and support for this great university, and in the year ahead may God abundantly bless you and all those you love.

A handwritten signature in black ink that reads "Robert Wild, S.J." The signature is written in a cursive, flowing style.

Rev. Robert A. Wild, S.J.
PRESIDENT

A Year of Caref

At Marquette, we groom tomorrow's leaders. One way we do accountability. And ensuring that every dollar we spend is spent past year. But by adhering to this measured approach, Marquette students and the world in which we live.

ul Stewardship

A group of students walking on a campus path. In the foreground, a young man in a grey and black jacket and blue pants walks towards the camera, holding a water bottle. Behind him, a young woman in a black jacket looks at a blue folder. To the right, another student in a black hoodie is blurred. The background shows trees with red and orange leaves, suggesting autumn. The lighting is warm and golden.

that is to lead by example. That means planning ahead. Demanding
wisely. Never have these qualities been more important than in the
is well-positioned to continue to make a difference in the lives of its

FINANCIAL AID BUDGET ALLOCATION

(dollars in millions)

Solid Performance in a Challenging Economy

The unprecedented economic environment of the past year affected all members of the Marquette family — students, parents, donors, faculty and administration. The university rose to the challenge, actively responding to the changing economic climate while maintaining our conservative financial position and the traditionally high educational standards that are Marquette's trademark.

Financial Aid and Scholarships

Recognizing that the economy is affecting students and their parents through declines in investments, salary freezes, job losses and other factors, in spring 2009, Marquette's Board of Trustees established the Bridge to the Future Fund. This initiative, which was supported with gifts from alumni, friends,

faculty, staff and trustees, provides immediate scholarship aid for students whose changing economic circumstances threaten their ability to continue their Marquette education.

Donors contributed more than \$1.1 million to the fund through November 2009. One example of the fund's impact was one donor's gift of \$250,000 that enabled 55 students to stay at Marquette through the remainder of the academic year. The Bridge to the Future Fund illustrates the commitment and generosity of the Marquette community when it comes to our students and their families.

Scholarship Aid Initiative

In the area of scholarships, a new partnership with the Boys & Girls Clubs of America will provide three full-tuition scholarships to the organization's national Youth of the Year award winners, beginning in fall 2010. Former Marquette student and NBA basketball star Dwyane Wade returned to campus to announce his endorsement of this partnership, which is the first in the nation for the Boys & Girls Clubs of America. Marquette has taken the lead as the national model for this partnership that the Boys & Girls Clubs hope will be widely replicated with university participants nationwide.

NBA star Dwyane Wade with two members of the Boys & Girls Clubs of Greater Milwaukee

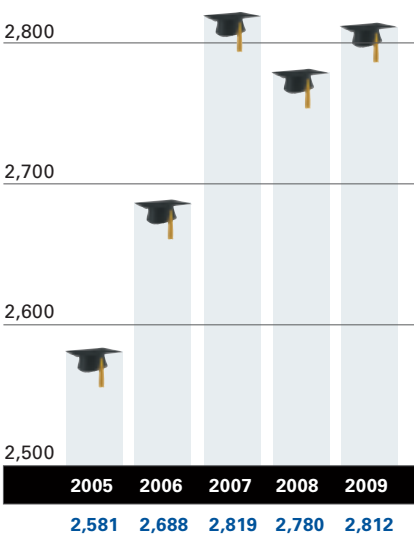

Enrollment and Retention

Once again proving that Marquette attracts the best and brightest, nearly 18,000 prospective students applied for fall 2009 admission. Approximately 1,950 were enrolled. Nearly 90 percent of full-time undergraduate students receive financial aid in the form of scholarships, grants, student employment and low-interest loans.

We believe our ability to continue to attract top-notch students in an environment where costs are more important than ever reflects the positive perception of our strong academics, the Marquette environment, adequate financial aid, and a faculty and staff that care about our students.

DEGREES GRANTED

RANKINGS

Marquette ranks 84th among the top 100 national universities in the 2010 edition of *America's Best Colleges*, released by **U.S. News & World Report**. The university once again was named among the "A+ Options for B Students" and one of only 31 universities recognized for service learning under "Programs to Look For." Additionally, Marquette was one of only 50 universities recognized in the "Great Schools, Great Prices" category, which relates a school's academic quality, as indicated by its 2010 ranking, to the 2008-09 academic year net cost of attendance for a student who receives the average level of need-based financial aid.

The Princeton Review named Marquette one of its *Best 371 Colleges* for 2010, placing it among only about 15 percent of the nation's 2,500 four-year colleges, and called the College of Business Administration and Graduate School of Management an outstanding business school in the new edition of its book, *The Best 301 Business Schools*.

TOTAL NEW COMMITMENTS (dollars in millions)

Ongoing Donor Support

Some donor families have been dedicated to Marquette for generations – others made their first gift to Marquette this past year. Old and new, our donor community is loyal, generous and committed to helping to make Marquette the best it can be.

Though students and parents think of the cost of education in terms of tuition, the reality is that tuition covers 62 percent of the cost of educating a Marquette student.

New giving commitments in fiscal 2009 totaled \$33.6 million – a difficult year for many donors who experienced losses in their personal wealth and reduced discretionary income. The 2009 giving level was well below the previous two years, which exceeded \$100 million each year. The record results in fiscal 2007 and 2008 were driven by large gifts of \$10 million and up, which accounted for 59 percent of \$82.8 million in fiscal 2007 and 42 percent of \$82.3 million in fiscal 2008.

Strong Financial Position

The financial landscape changed dramatically in fiscal 2009. In response, Marquette initiated a strategy that was conservative in its approach and addressed the major areas of our operations. This strategy included:

- Budgeting revenues and enrollment conservatively while maintaining quality and diversity.

- Emphasizing cost efficiencies and aggressively promoting cost-reduction and quality-enhancement initiatives developed by our Renewal Task Force.
- Working to increase fundraising for financial aid to provide increased grants and scholarships.
- Continuing to diversify the endowment to ensure intergenerational equity.
- Broadening compliance and risk assessment.
- Managing capital expenditures selectively by prioritizing safety, security and functionality.

The results tell the story. Net tuition and fee revenues increased 6 percent for the year. Fiscal 2009 was the 10th consecutive year that Marquette recorded a modest surplus for the year. In addition, only 4 percent of the university's 2009 operating budget came from the endowment – a significantly smaller percentage than many other universities. With less reliance on the endowment for operations, university budgets are more closely aligned with tuition and fee revenues and related operating expenses. This stability is an asset during this challenging economy.

Marquette responded to the economic downturn by scrutinizing operations and expenses and taking a strategic approach toward cost reduction. Energy, physical plant infrastructure and streamlining

business processes are key areas of focus for the university's Renewal Task Force. The task force examines operational processes and costs and then implements changes across the university. Since the RTF was created in 1999, the cumulative funding identified as a result of efficiency initiatives has been more than \$67 million.

Expenses are one side of the equation. Revenues are the other. In response to the economic climate, the Board of Trustees authorized the lowest tuition rate increase, on average, in 30 years. Annual undergraduate tuition for 2009 -10 increased less than \$1,000.

Marquette received its first rating in the public credit market in fiscal 2009 – a strong A2 credit rating from Moody's. Fewer than 500 colleges and universities have this type of credit rating. This independent rating helped the

university obtain favorable financing for several capital projects.

In fall 2008, Marquette sold \$84 million of revenue bonds through the Wisconsin Health and Educational Facilities Authority to fund the construction of the new Law School and for residence hall renovations. The bonds were sold out within three hours – a testimony to the financial strength and reputation of Marquette.

Well-positioned

Marquette has weathered all types of economic ups and downs throughout its 127-year history. With the university's nationally ranked academic programs driving strong student demand, the ongoing cost-efficiency initiatives, and the conservative approach to operations and strong financial position, Marquette is well-positioned for the future.

Assisted by the Kemp Scholarship Fund and other scholarships

"This was my first-choice college, but when my parents started looking at the costs, it seemed impossible. The scholarship aid I received means everything to me because it has given me this opportunity. The classes are great, I've made a lot of friends in the first two years, and I'm a member of the Intervarsity Christian Fellowship and the Marquette Swim and Dive Team. I don't think I could get all of this anywhere else."

C A P I T A L P R O J E C T S

Discovery Learning Complex, an innovative discovery laboratory for the College of Engineering. The first phase of this \$100 million facility is under way. The building is being designed to foster collaboration, placing classrooms, research labs, faculty offices and student study areas in close proximity. The move into the new 115,000-square-foot building is planned for August 2011.

McCabe Hall, which opened in fall 2009 for sophomores. This project involved remodeling a 1920s building to accommodate 216 students in suite-style rooms. Other amenities include a study lounge, workroom, laundry room and reflection room. The renovation maintained some of the original architectural details while incorporating innovative LEED sustainable design practices.

Some universities have cut back on major capital improvements, but Marquette's stable financial position has enabled it to move ahead with several key projects. The major investments in the university's future include:

Zilber Hall, a new student services/administration building that opened in November 2009. The building houses a common service center for students, including the offices of Undergraduate Admissions, Bursar, Registrar and Student Financial Aid. The facility also includes the Office of the President, University Advancement and other administrative services. The building is named for Milwaukee real estate developer Joseph J. Zilber and his wife, Vera. In August 2007, Zilber contributed \$30 million to the Law School, including \$25 million for law student scholarships and \$5 million for the building.

Eckstein Hall, new home of the Law School. This 200,000-square-foot signature building on Tory Hill, a prominent corner at the southeast end of campus, will include courtrooms, classrooms, faculty office suites, a library, conference center and café. The new Law School facility, which is expected to open in fall 2010, honors alumni Raymond A. and Kathryn A. Eckstein, who donated \$51 million to the building.

Why do people give to Marquette's endowment?

Most donors express a desire to have an impact on future generations – to leave an enduring gift.

'09	\$285,516

endo

The Legacy of Our Endowment

Endowed funds are powerful gifts. With these powerful gifts come powerful responsibilities to prudently manage donors' investments to achieve their long-term goals. The endowment was founded on the principles of responsible financial management and accountability. These strong principles will continue to guide the university's practices in managing the precious funds entrusted to Marquette in the years ahead.

Endowment Profile

Given the recent downturn in the financial markets and investor concerns about complicated and risky financial services vehicles, donors want to know that their investments are well-managed and used according to their wishes.

When the university receives an endowment gift, it is invested in the endowment pool, which is a collection of nearly 1,000 endowment accounts. Each of these accounts is a permanent fund to be preserved and used according to the specified wishes of each benefactor.

Marquette's endowment pool was \$285.5 million as of June 2009, down 20 percent from \$357.3 million recorded in 2008. This decline was significantly less than what was experienced by many others. In the previous four years the university's endowment performance ranked in the top half of the National Association of College and University Business Officers survey that is used as a benchmark.

Wmment

A COMPELLING INVESTMENT

Through the endowment, the university manages approximately 750 scholarship endowments that range in size from less than \$3,000 to more than \$4 million. The top 100 endowed scholarship funds represent \$58.9 million, or 51.7 percent, of the total scholarship endowment pool. These funds generated \$2.5 million in awards in fiscal year 2009, benefiting more than 500 students. Nearly 80 percent of the top funds were established by generous individual benefactors.

Responsible Management

Three areas that have the greatest impact on the long-term growth of Marquette's endowment are fundraising activities, spending policy and investment returns.

The university links fundraising activities to the spending approach in developing endowment goals and making strategic decisions regarding investment manager selection, asset allocation and performance objectives. The assets of the endowment are invested following strict guidelines. The endowment's diversified portfolio includes investments in fixed income, equity, money market reserves and other instruments. This diversified investment approach is one of the key reasons why Marquette's endowment did not decline as significantly as many others during the market downturn.

Werner Chair IN SECURE AND RENEWABLE ENERGY SYSTEMS

Tom Werner, Eng '86, remembers when environmental concerns first started to tug at his heart. "I remember riding a bike in Wisconsin in winter behind a car breathing the exhaust thinking that exhaust was probably not good for us. That was all the way back in the late '70s," he says. "My intuition about renewable energy started then."

But it wasn't until 2003, when he joined SunPower Corp. as CEO, that his interest became a professional calling. In 2009, he brought that passion to his alma mater, where he and his wife, Suzanne, pledged \$5 million to the College of Engineering to create a new endowed chair in secure and renewable energy systems.

The chair will lead a research cluster of four to six faculty and develop cutting-edge curriculum. Werner hopes the first chair-holder will be innovative and practical. The first thing he'd love for that person to tackle: low-cost renewable electricity. "The global electrical market is a trillion-dollar market," he notes, "so the opportunity to graduate students who have the opportunity to change the world and have great commercial success is very good."

Since 2004, the university has utilized a fixed-dollar spending approach that strives to provide a predictable stream of funding for programs supported by the endowment while maintaining the purchasing power of the endowment assets. Over the long term, the university's goal is to provide average annual spendable funds of 5 percent of the endowment's market value. For fiscal year 2010, Marquette's endowment will provide more than \$13.3 million in spendable income to meet critical financial needs.

The investment policy focuses on achieving consistent long-term financial gains and preserving the strength of the endowment through responsible investment allocations. Though actual returns can vary from year to year, the university's goal is to achieve an annual return of between 8 percent

and 9 percent over the long term. To accomplish this, the university uses a total return strategy that is designed to generate investment returns through capital appreciation and income.

Compared to a broad policy index, these strategies have served Marquette well. In each of the past one-, three-, five- and 10-year periods, the university outperformed the broad policy index every time. During the past five years, this translated into a cumulative return as of Sept. 30, 2009 of 24.8 percent versus the benchmark return of 19.1 percent.

Assisted by Bridge to
the Future Fund

"Being a female interested in engineering, you have to find your place. I found mine here. In Dr. Kevin Craig's GEEN 2 class, we were introduced to Father Dan Pekarske, who talked about helping other cultures fix problems but doing it with an understanding of their cultural beliefs and practices. That really got me thinking about how engineers have to ask questions to understand who we're serving and how to best fit their needs. That's my main goal now, to help another culture."

University announces licensing agreement

Marquette and the University of Wisconsin-Milwaukee Research Foundation completed a license agreement with Promentis Pharmaceuticals Inc., a Milwaukee-based company started by Dr. David Baker, assistant professor of biomedical sciences, and Dr. John Mantsch, associate professor of biomedical sciences. Promentis aims to develop and commercialize chemical compounds that have shown promise as a novel treatment for schizophrenia and other central nervous system conditions.

NML makes gift of \$1 million

Northwestern Mutual Foundation donated \$1 million to Marquette Law School for construction of its new building, Eckstein Hall, which is scheduled to open in fall 2010. The 200,000-square-foot \$85 million building located on Tory Hill is named in honor of alumni Ray and Kay Eckstein, who donated \$51 million to the Law School. The building will feature the Zilber Atrium, recognizing a \$30 million gift from Milwaukee real estate developer and alumnus Joseph Zilber.

All-University Award Winners

Joseph Zilber honored as Alumnus of the Year

Joseph J. Zilber, Bus Ad '39, Law '41, was named the 2009 Marquette University All-University Alumnus of the Year. At 91, Zilber is still managing Zilber, Ltd., the multimillion dollar real estate empire he created. Zilber was recognized for his commitment to Milwaukee and Marquette. He donated \$50 million to revitalize Milwaukee neighborhoods and \$30 million to support scholarships for law students and help develop the new Marquette Law School. Marquette's new student services building — which opened in November — was appropriately named Joseph and Vera Zilber Hall. The university honored more than 50 alumni and friends at the individual college ceremonies during Alumni Awards Weekend.

Moments

College of Education partners with Teach For America

Teach For America expanded to Milwaukee last year, and Marquette's College of Education became one of its university partners. The program places recent college graduates with strong academic and leadership records in school districts nationwide with the highest needs. The program will bring 30 TFA corps members to Milwaukee each year for the next three years as part of a national growth plan.

U.S. Rep. Thomas Petri receives an Aspin Center Award.

Aspin Center honors Petri and Drew

U.S. Rep. Thomas Petri and William Ryan Drew were honored in April by the Les Aspin Center for Government. Petri received the Les Aspin Distinguished Public Service Award to honor his career in public service and commitment to higher education. Representing Wisconsin's 6th Congressional district since 1979, Petri is serving his 15th consecutive term. As a senior member of the House Education and Labor Committee, Petri has helped make college more accessible for lower- and middle-class families. Drew, Law '66, received the Les Aspin Founders Award for his support of and contributions to the center. Drew served as an elected and appointed official of Milwaukee city and county governments, has been executive director of the Milwaukee County Research Park since 1998, and is vice chairman of the Southeastern Wisconsin Regional Planning Commission. He has been a member of the Aspin Center National Board of Visitors since it was founded in 1995.

Marquette partners with two premier programs:

The Boys & Girls Clubs of America named Marquette its first national education partner in a program designed to extend educational opportunities for outstanding young people. Marquette will provide up to three full-tuition scholarships annually to winners of BGCA's Youth of the Year program, which recognizes exceptional Boys & Girls Clubs members. Each scholarship, renewable for four years, is valued at more than \$110,000. The first scholarships will be awarded to students who enroll as freshmen in

the fall 2010 semester. Youth of the Year winners are recognized for outstanding contributions to their families, schools, communities and Boys & Girls Clubs and for overcoming obstacles to their success.

The Cristo Rey Network launched its University Partner Initiative, and Marquette is one of seven founding national partners. The network provides college preparatory education to economically challenged young men and women in urban communities across the United States. Partners commit to help the network support its graduates and schools through scholarship programs, job sponsorship, pre-college summer enrichment programs, academic support programs and more.

Stimulus funding supports STEM initiative

Marquette was awarded a nearly \$900,000 Robert Noyce Teacher Scholarship Program grant from the National Science Foundation to attract and train 24 highly qualified science, technology, engineering and mathematics majors to teach in high-need middle or high schools. The program will include intensive field experiences integrated with classroom instruction through a partnership between the College of Engineering and Helen Way Klingler College of Arts and Sciences and the teacher preparation program in the College of Education. Up to three years of scholarships will be allocated — \$10,000 for the first year, \$12,000 for the second and \$14,000 for the third — to give STEM majors another incentive to choose teaching. In return, students must work two years in a high-need school after

graduation for every year they accept the scholarship. Recruitment for the Marquette program began in the fall, and scholarships will be awarded between 2010-14.

Dr. Stephen Downs wins top research award

Dr. Stephen Downs, Wehr Distinguished Professor of Biological Sciences, was named the university's 2009 recipient of the Lawrence G. Haggerty Award for Research Excellence. The annual award recognizes a faculty member who has demonstrated scholarly distinction and an all-encompassing belief in excellence. Downs researches the process of normal egg maturation in mammals, specifically the metabolic pathways that help regulate development of oocytes — unfertilized egg cells. Understanding how these metabolic pathways regulate normal maturation is important because abnormalities in the process can lead to abnormal development of eggs, manifested in chromosomal irregularities such as Down syndrome. Downs received a \$5,000 stipend.

School of Dentistry north side clinic opens

The School of Dentistry opened a community dental clinic on Milwaukee's north side to serve adolescents and adults five days a week. The facility, Marquette University Community Dental Clinic — North, has 10 dental chairs and anticipates seeing more than 1,000 patients annually. A full-time faculty member, Dr. Albert Abena, oversees the facility and is assisted by part-time dental and dental hygiene faculty members. Marquette dental students, under faculty supervision, provide dental care. The School of Dentistry's Community Dental Clinic — South opened on the city's south side in 2007. According to Dean William Lobb, the clinics serve nearly 20,000 patients annually with more than 80,000 patient visits.

Top award funds reading program

The College of Health Sciences received a \$4 million Early Reading First grant from the U.S. Department

of Education to fund the Wisconsin Reading Acquisition Program. It's the largest research award received by the College of Health Sciences and the largest three-year research grant for Marquette. WRAP is a collaboration between Marquette and Day Care Services for Children Inc., a Head Start agency, to serve 300 at-risk, low-income 3- and 4-year-olds from diverse cultural and linguistic backgrounds each year. It is led by Drs. Maura Moyle and Brenda Gorman, assistant professors of speech pathology and audiology, and Sue Berman, clinical

instructor of speech pathology and audiology. The program is committed to improving children's oral language, written language awareness, alphabet knowledge, verbal reasoning abilities, analytical thinking and English language skills.

Catholic Education Consortium formed

Marquette, Alverno College, Cardinal Stritch University, Marian University and Mount Mary College formed the Greater Milwaukee Catholic Education Consortium to provide academic resources and professional expertise for the 132 Catholic K-12 schools in the Archdiocese of Milwaukee. The organization's start-up efforts were aided by a \$600,000 three-year gift from the Stollenwerk Family Foundation, as well as financial and in-kind support from the five higher education institutions and partnership support from the Archdiocese's Office for Schools.

Top teachers honored

The 2009 Faculty Awards for Teaching Excellence were awarded at the Père Marquette Day dinner celebration held at the end of the academic year. Rev. Bryan Massingale, Arts '79, associate professor of theology, received the Robert and Mary Gettel Faculty Award for Teaching Excellence; and Dr. Christopher Foley, Eng '86, Grad '89 and '96, associate professor of civil and environmental engineering, and Dr. Christine Shaw, clinical associate professor of nursing, were awarded the Rev. John P. Raynor, S.J., Faculty Awards for Teaching Excellence.

Academic roundup

Meeting the changing needs of students is a university priority. New programs introduced this year include:

- A certificate in entrepreneurship — a program aimed at giving students the skills needed to create a business — offered through the Graduate School of Management began in the fall.
- The Center for Real Estate was approved and will foster research in predatory lending, credit availability, the effects of tax incremental financing districts, and the determinants of retail sales and rents in planned shopping centers, among other topics.
- The Law School received \$310,000 to implement the Milwaukee Foreclosure Mediation Program.
- Eight task force groups convened to review the results of a self-assessment survey to study the first-year student experience at Marquette. The university was one of 20 four-year institutions selected to work with the Foundations of Excellence project of the Policy Center on the First Year of College.
- The J. William and Mary Diederich College of Communication was one of 10 schools of journalism nationwide selected by the U.S. Department of State to host international journalists as part of the Edward R. Murrow Program for Journalists. Fifteen journalists from Afghanistan, Bangladesh, India, Kazakhstan, Nepal, Pakistan and Sri Lanka participated in interactive, integrated seminars with faculty, professional journalists and students. Marquette was the only Catholic institution selected to participate.
- Two new majors were approved — one for undergraduate students and one for graduate students. Biology for the Professions debuted in the fall as a major for middle and high school majors in the College of Education. A master's and doctoral program in Computational Sciences was established in the Department of Mathematics, Statistics and Computer Science.

CENTENNIAL CELEBRATION OF WOMEN AT MARQUETTE

In 1909, Marquette University became the first Catholic university in the world to offer coeducation as part of its regular undergraduate program. Since that time, the role of women at Marquette has changed and expanded dramatically, with women now making up more than 50 percent of the student body. Of the many lessons learned in the past 100 years of women at Marquette, two are most salient in our understanding. The first is that we are better together than we are apart, and the second is that education — especially Jesuit education — is not meant to be parceled out to the few, but rather spread freely among the many. The Marquette community is celebrating the 100th anniversary of this landmark event in the university's history throughout the 2009-10 academic year.
