# President's Message

## For patient happiness around the world — offering new and innovative treatment choices

Otsuka Medical Devices was initially established in 2011 with the goal of becoming the third business pillar supporting the total healthcare mission of the Otsuka group: to contribute to people's health worldwide. We are now shifting from the research and development stage to the business phase.

As society ages and lifestyles change, an ever-increasing number of patients suffer from diseases that cannot be treated by pharmaceutical therapies alone. Our focus is on the development of minimally invasive devices as alternative therapeutic choices. In November 2023, our novel therapy, ultrasound renal denervation, was approved by the FDA. It is intended as an adjunctive treatment option for the treatment of hypertension when lifestyle changes and medications have not adequately controlled a patient's blood pressure. The therapy is now commercially available in Europe and the U.S. In Japan, a clinical trial is underway. We will continue to accelerate our activities to contribute to the health of more patients by offering alternative treatments like this. Our other key focus areas involve developing new treatment methods using digital technology, and novel devices incorporating pharmaceuticals through collaboration with other Otsuka group companies.

We continue to take on the challenges of healthcare with courage and perseverance to help patients regain their health and live a fulfilling life. As a member of the Otsuka group, a total healthcare company, we strive to contribute to the well-being of people worldwide.

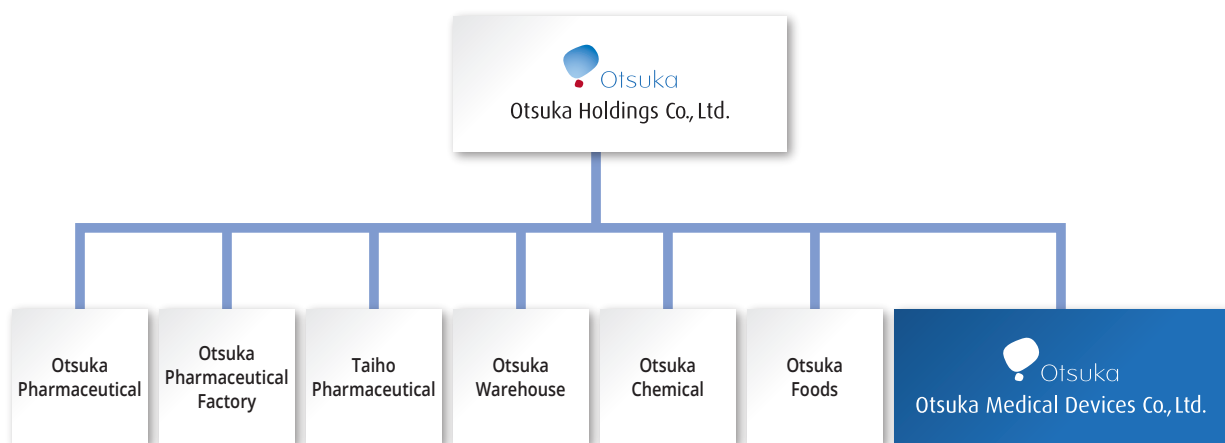

*Noriko Tojo*

President and Representative Director  
Otsuka Medical Devices Co., Ltd.

## Our Mission

Otsuka Medical Devices has focused on developing unique solutions that improve the health and well-being of patients whose medical needs and conditions cannot yet be fulfilled by existing treatment methods. To achieve our aspiration of becoming a pioneer in the medical device industry, we combine global R&D efforts with the technology and drug discovery know-how inherent within the Otsuka group's heritage.

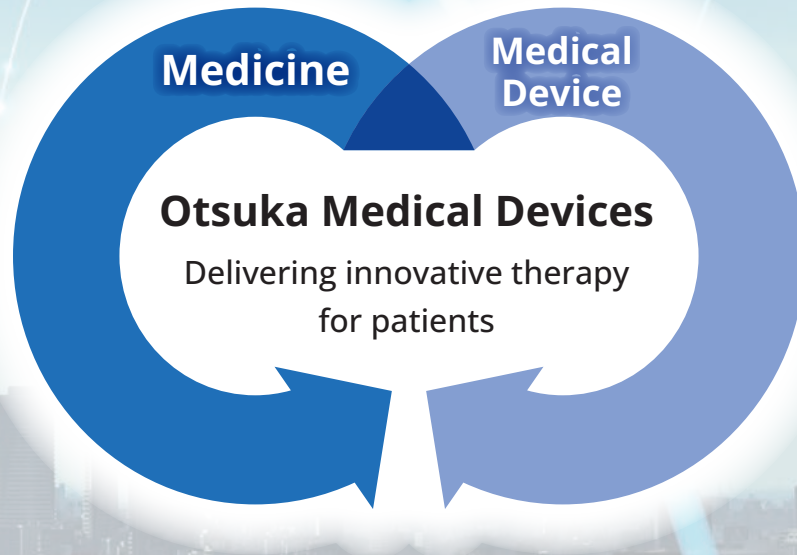

We will do what it takes to offer patients new innovative treatment choices and stand true to the Otsuka corporate philosophy: "Otsuka—people creating new products for better health worldwide".

### Otsuka Group Main Operating Companies

## Business Overview

Otsuka Medical Devices is striving to make a difference for patients where existing therapies have either proved ineffective or the treatment options they need are yet to exist. Through our advanced device technology with our group members Recor Medical and Veryan Medical, we are confident in our ability to accelerate innovative treatments such as endovascular therapy to provide solutions to currently untreatable conditions.

## Our Commitment to Quality

The Otsuka group is committed to ensuring the safety of patients and medical professionals through enhancing the quality of its products and continuous improvement of the quality management system. This commitment stretches back to the group's founding and the words of founder Busaburo Otsuka (1891–1970), "Quality is vital in a factory and so is packaging. We have to manufacture and market, putting ourselves in the consumer's position." Otsuka Medical Devices honored our heritage by establishing an original "quality first" policy that is implemented throughout our global manufacturing operations to guarantee the delivery of reliable quality worldwide.

### Certified ISO 13485:2016 (September 2022)

Scope of Certification: Design, development, manufacture, distribution, and shipping of vascular stents

Location: Head office, Tokyo Headquarters, HARUMI Technology Center

MD 770118 / ISO 13485

### TOPICS

## HARUMI Technology Center

CROSS DOCK HARUMI 5F 4-7-4, Harumi, Chuo-ku, Tokyo

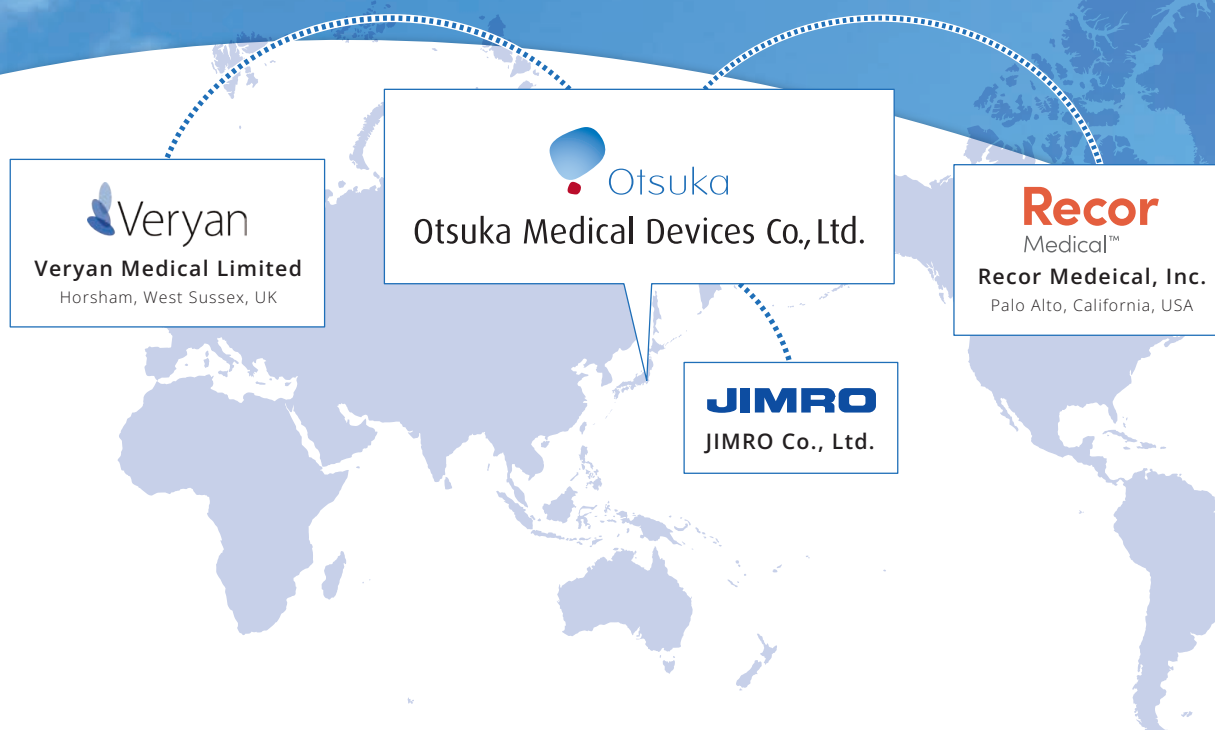

Established in July 2021, HARUMI Technology Center houses state-of-the-art laboratory facilities, cleanrooms, and a Learning Studio that showcases features and clinical applications of our products. The center doubles as a global research hub that connects us with our partners and medical professionals in Japan and overseas.

# Otsuka Medical Devices' Global Network

Otsuka Medical Devices works in tandem with affiliated companies worldwide via a global R&D network. Through knowledge sharing and the integration of technology, the network is an international platform for providing innovative treatments for patients.
