

AppInsights

Persistent's AppInsights is like Google Analytics for Appian—it provides valuable insights into tasks, actions, users and performance of SAIL forms grouped by application.

Leveraging Appian process reports and log files, AppInsights provides Appian application owners complete visibility into application usage and performance. Users can drill down from applications to actions to processes to sub-processes to tasks, providing complete visibility to usage of the complete Appian instance, grouped by application.

AppInsights provides Appian application owners complete visibility to application usage and performance.

Application View

Apply the 'Application Lens' to all Appian task metrics. Which application was busy at what time?

User Insights

Visibility to historic data from log files. Who logged in when, and did what? The complete audit trail of actions in a session.

Task Insights

Complete drill down from applications to actions to processes to sub-processes to tasks, at any point in time in the past. Process archival not an issue.

Performance Insights

How did each SAIL form in each application perform? Min, max, mean and initial load times.

Application Usage

Reporting ready-to-share charts and graphs on application usage.

Plug and Play

No changes required on the existing process models. Just deploy and get insights.

About Persistent

Persistent Systems (BSE & NSE: PERSISTENT) builds software that drives our customers' business; enterprises and software product companies with software at the core of their digital transformation.
