

# Batch Disposition

Persistent's Batch Disposition application provides an intuitive and dynamic interface to business users, to automate the entire workflow of drug package creation and review.

It provides a seamless flow which helps to increase the efficiency and maintains transparency across various teams involved. Leveraging the Appian provided features, Co-Packers can create batch records with unique package lot numbers. Business users can add additional electronic documents and send the batch for review. The required authority can approve/reject/request for correction while reviewing the created batch record.

The Audit Trail facility enables users to view the changed history of fields, tasks etc. It displays detailed information about the status of the batch records.

## Batch Disposition

Application provides a simplified user interface with 3-D security to automate the workflows for medical batches packaging and disposition.

### Digitization of Work

Flexible work-flows and minimized paperwork this helps increase efficiency and reduces cost.

### Accessibility & 3-D Security

Information is passed securely across various departments. Only authorized users can access the information from anywhere. Every level of user interaction is secure.

### Easy Storage

With digital document management system, user can easily scan the documents and store them online in a repository. Supports version control of all the documents and files.

### Task Assignments & Comms.

Business User can easily create, review and approve/reject Batch Record.

### Unique package Lot Number

Every batch is given a unique number which cannot be repeated across the lots, this increases safety.

### Artwork Upload

Business users can also upload artwork associated with labeling of the medicines.

## About Persistent

Persistent Systems (BSE & NSE: PERSISTENT) builds software that drives our customers' business; enterprises and software product companies with software at the core of their digital transformation.
