Pew Research Center
Spring 2024 Global Attitudes Survey
August 22, 2024 Release

Methodological notes:

- Survey results are based on national samples. For further details on sample designs, refer to the Methodology section and our [international survey methods database](#).
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers.
- Prior to 2024, combined totals were based on rounded topline figures. Going forward, totals will be based on unrounded topline figures, so combined totals might be different than in previous years.
- Since 2007, Pew Research Center has used an automated process to generate toplines for its Global Attitudes surveys. As a result, numbers may differ slightly from those published prior to 2007.
- Some data from India in 2023 and Bangladesh in 2014 is not directly comparable to the current survey due to large differences in item nonresponse (such as when respondents say they don’t know the answer to a question). The data is included in a separate table for reference, where relevant.
- For some countries, trends for certain years are omitted due to differences in sample design or population coverage. Omitted trends often reflect less representative samples than more recent surveys in the same countries. Trends that are omitted include:
 - India prior to Winter 2013-2014
 - Bangladesh prior to 2014
- Not all questions included in the Spring 2024 Global Attitudes Survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.
